Getting Started

Login

Access the KINTO Smart Ops system through your web browser. Enter your username and password to log in.

Steps to Login:

- Enter your username in the "Username" field
- Enter your password in the "Password" field
- Click the "Login" button
- If you forgot your password, click "Forgot your password?" to reset it

Navigation

After logging in, you'll see the main dashboard with a sidebar navigation menu on the left. The sidebar is organized into 9 collapsible modules:

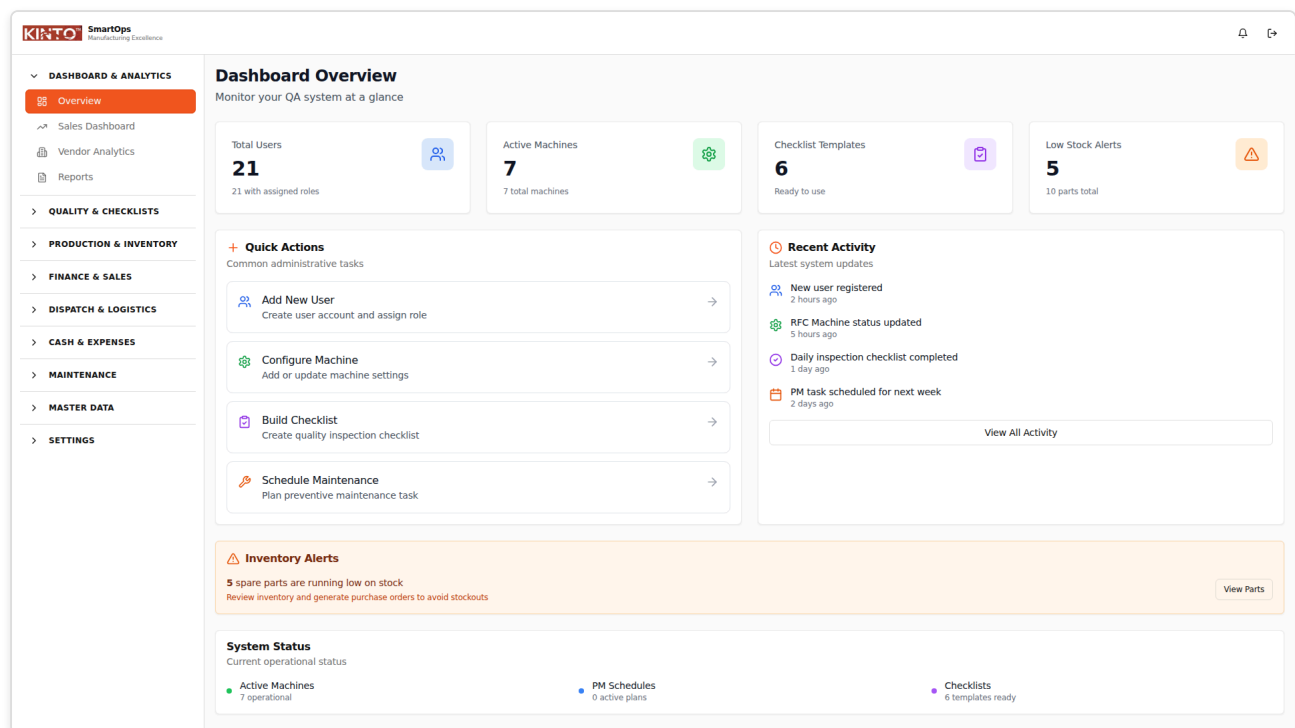

- **Dashboard & Analytics** - View business performance metrics
- **Quality & Checklists** - Manage quality control checklists
- **Production & Inventory** - Track production and inventory
- **Finance & Sales** - Handle invoices, payments, and credit notes
- **Dispatch & Logistics** - Manage gatepasses and dispatch tracking
- **Cash & Expenses** - Daily cash register and expense management
- **Maintenance** - Preventive maintenance scheduling
- **Master Data** - Manage products, vendors, and machines
- **Settings** - System configuration and user management

Click on any module header to expand or collapse its menu items.

Dashboard & Analytics

Overview Dashboard

The Overview Dashboard provides a comprehensive view of your business operations at a glance.

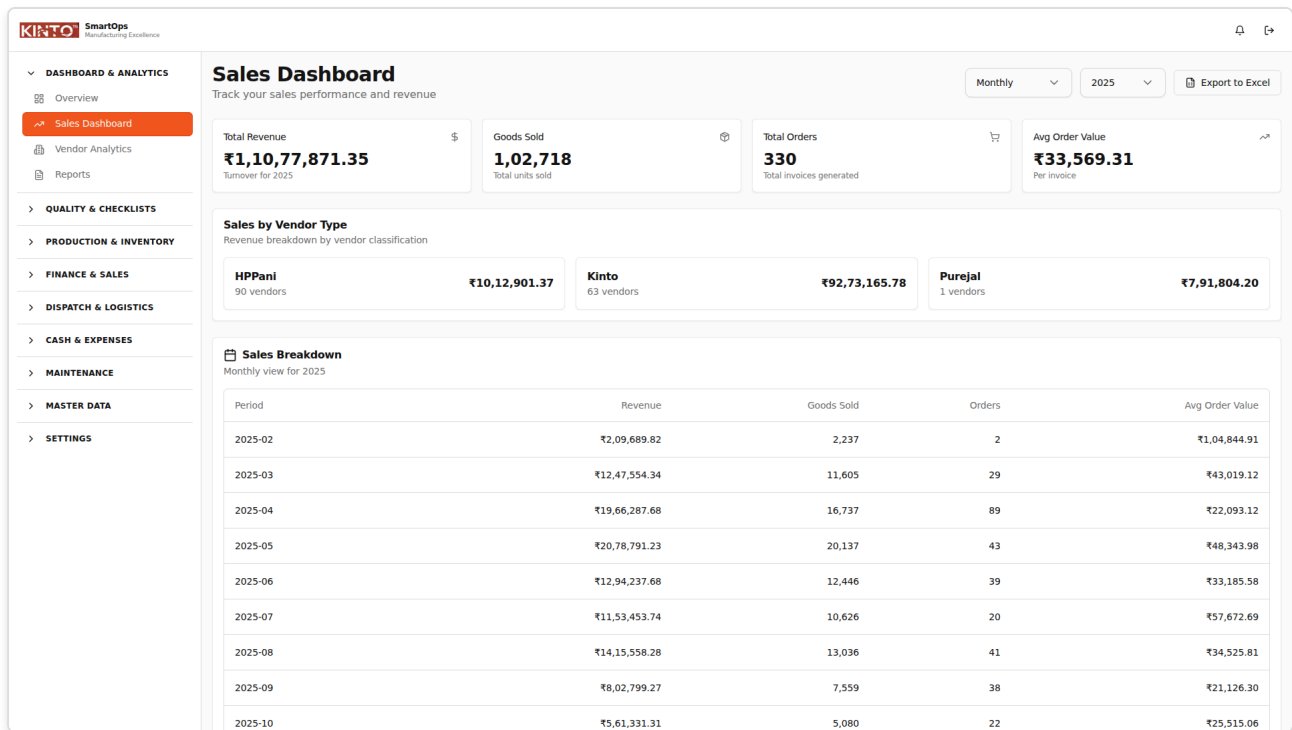

Key Features:

- Today's production summary
- Pending quality checks count
- Open gatepasses and dispatch status
- Recent activity timeline
- Quick action buttons for common tasks

Sales Dashboard

Monitor your sales performance with detailed analytics and charts.

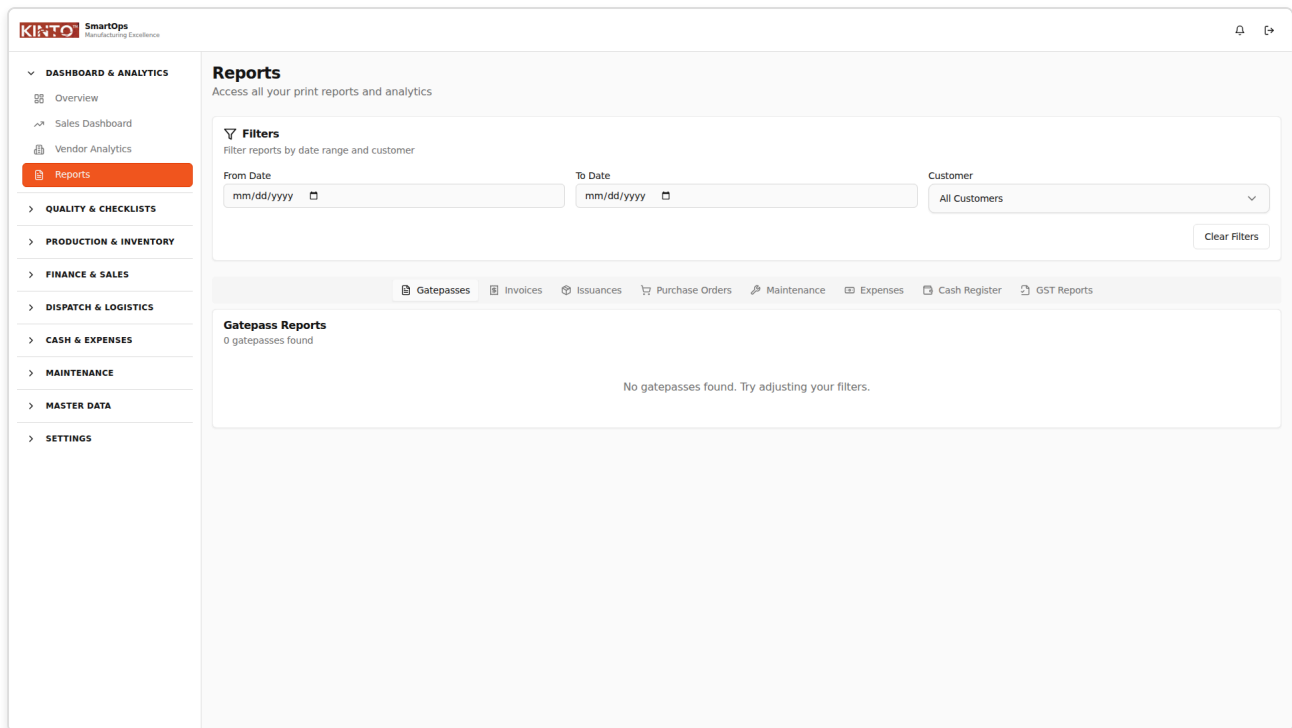

Available Information:

- Monthly sales trends
- Top selling products
- Customer-wise revenue breakdown
- Payment collection status
- Outstanding receivables summary

Reports

Access comprehensive reports for business analysis and decision making.

Available Reports:

- Production Reports
- Sales Reports
- Inventory Reports
- Financial Reports
- Quality Reports
- GST Reports

Quality & Checklists

Checklist Builder

Create and manage quality control checklists for various processes.

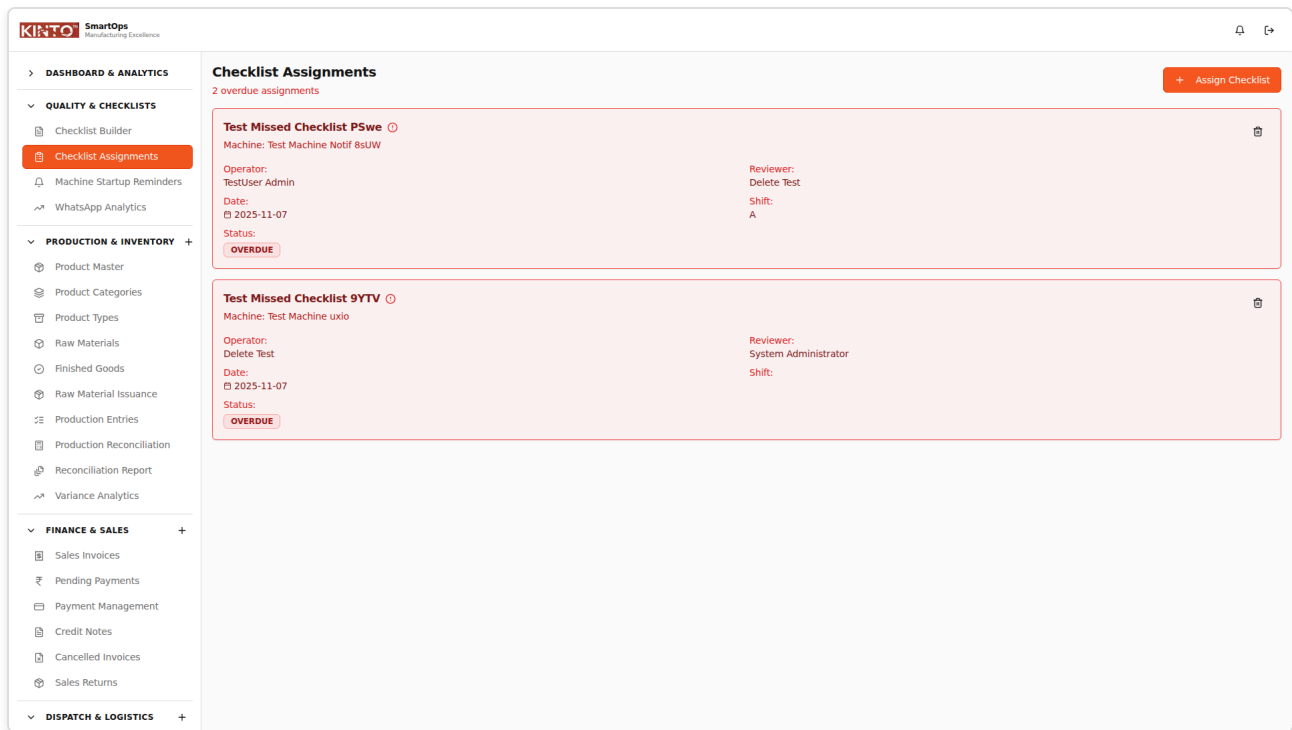

The screenshot displays the 'Checklist Builder' interface within the KintO SmartOps system. The left sidebar contains a navigation menu with categories: 'DASHBOARD & ANALYTICS', 'QUALITY & CHECKLISTS' (with 'Checklist Builder' highlighted), 'PRODUCTION & INVENTORY', 'FINANCE & SALES', and 'DISPATCH & LOGISTICS'. The main content area is titled 'Checklist Builder' and includes fields for 'Checklist Name' (e.g., RFC Machine Daily Checklist), 'Assign to Machine (Optional)' (set to 'None (General Checklist)'), and a 'Tasks' section with a '+ Add Task' button. A task is added with the name 'e.g., Clean the Machine' and verification criteria 'e.g., Wipe down surfaces and remove any spills'. At the bottom, there are 'Save Checklist' and 'Clear Form' buttons.

Features:

- Create custom checklists with multiple question types
- Set up approval workflows
- Define checklist frequency (daily, weekly, monthly)
- Assign checklists to specific machines or processes

Checklist Assignments

View and manage checklist assignments across machines and operators.

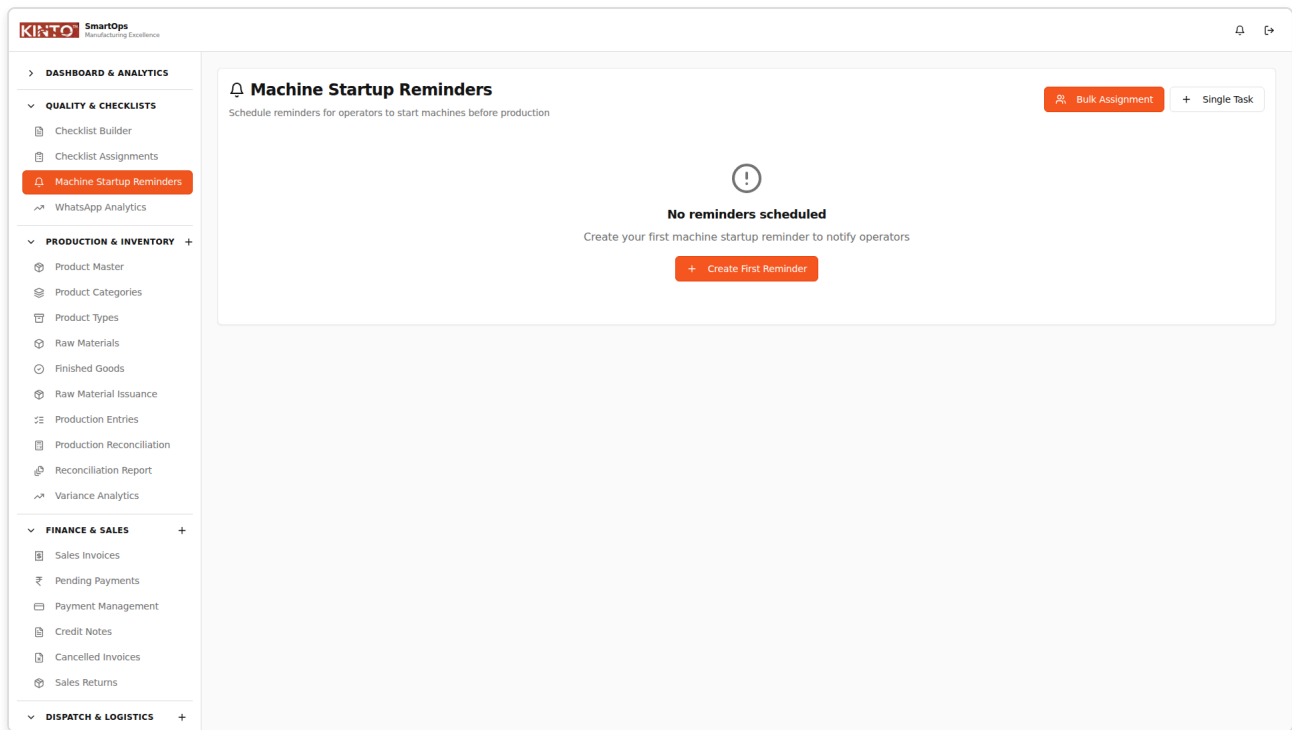

Capabilities:

- View pending checklists
- Assign operators to checklists
- Track completion status
- Review submitted responses

Machine Startup Reminders

Configure automated WhatsApp reminders for machine startup checklists.

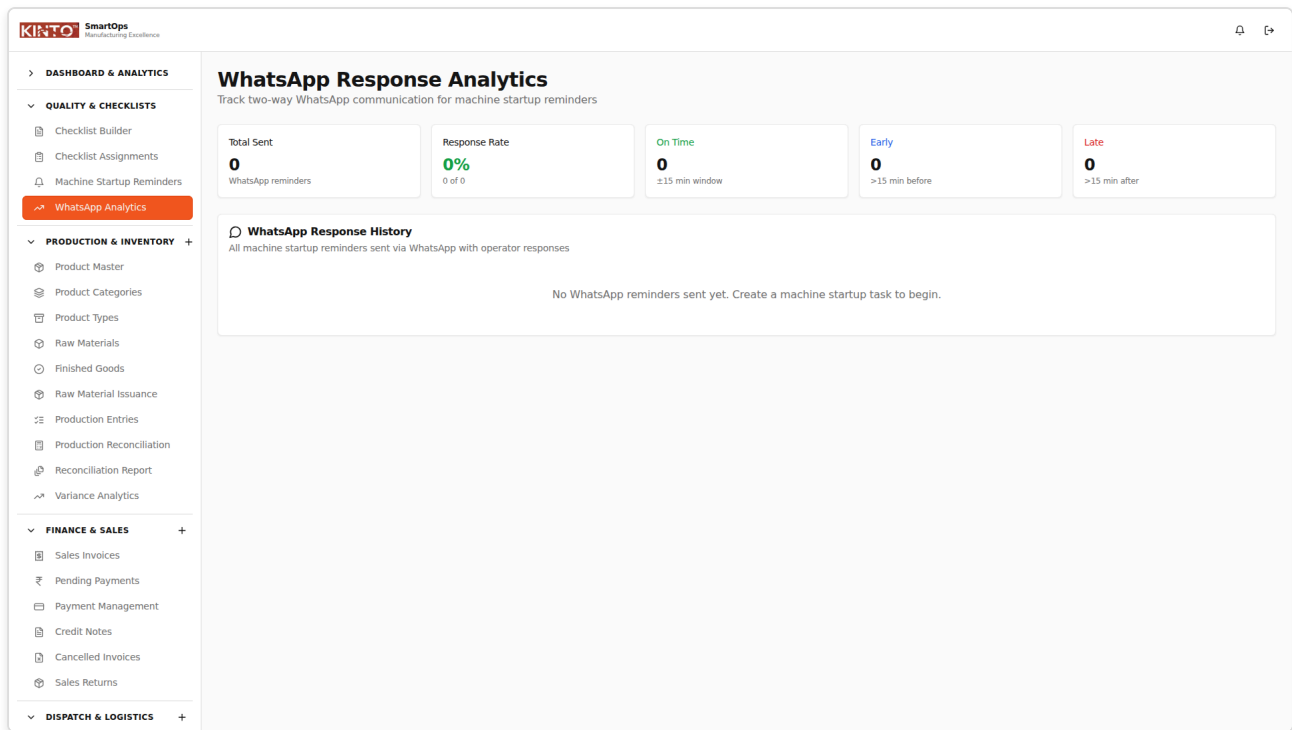

Configuration Options:

- Set reminder times for each machine
- Configure WhatsApp notification preferences
- Enable/disable reminders per machine
- Set escalation paths for missed checklists

WhatsApp Analytics

Monitor WhatsApp integration performance and message delivery statistics.

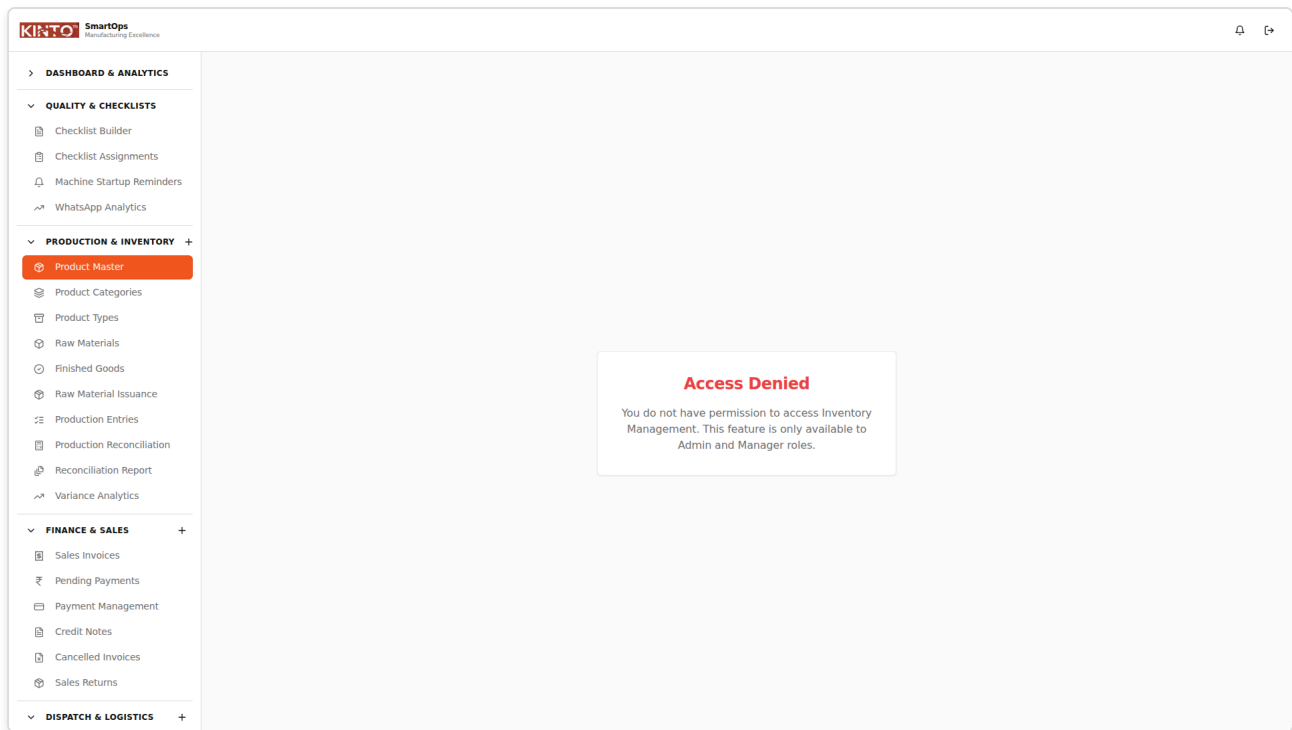

Tracked Metrics:

- Messages sent vs delivered
- Response rates
- Checklist completion via WhatsApp
- Failed message analysis

Production & Inventory

Product Master

Manage your product catalog with detailed specifications and Bill of Materials.

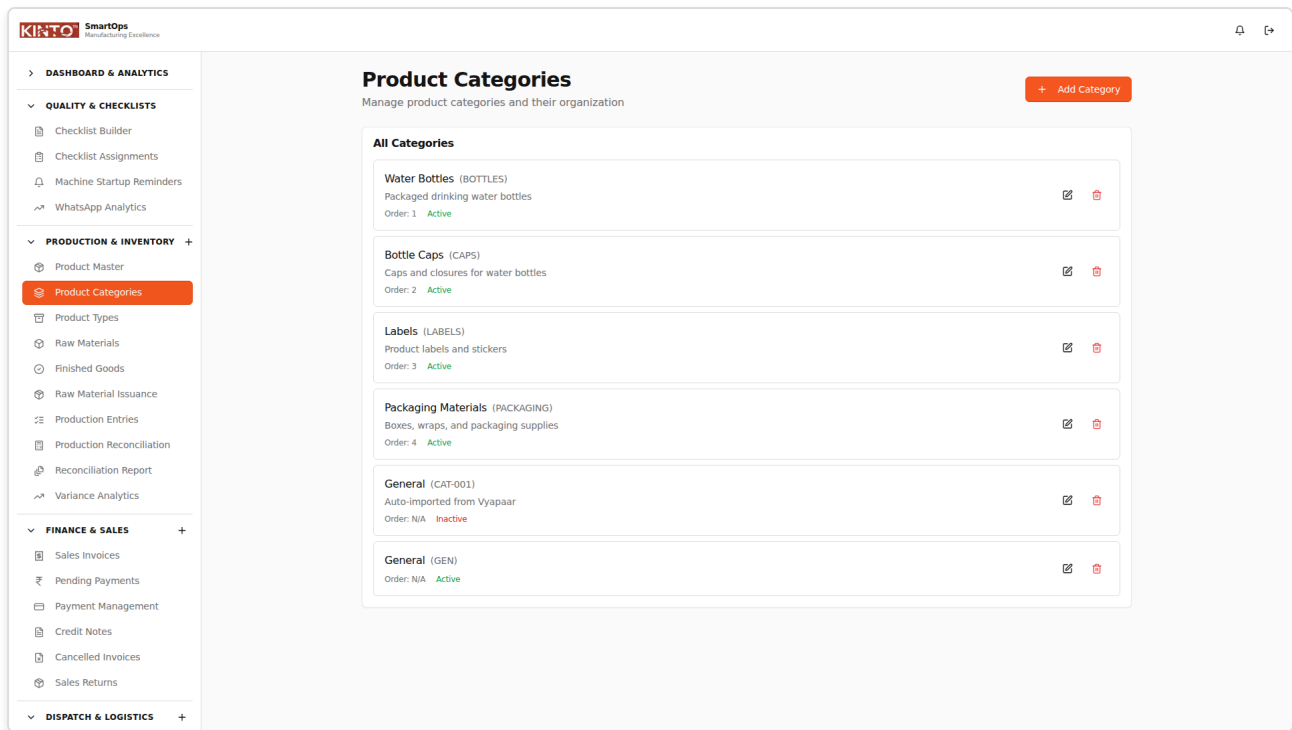

Features:

- Add/edit products with full specifications
- Define Bill of Materials (BOM) for each product
- Set standard production quantities
- Link products to raw materials

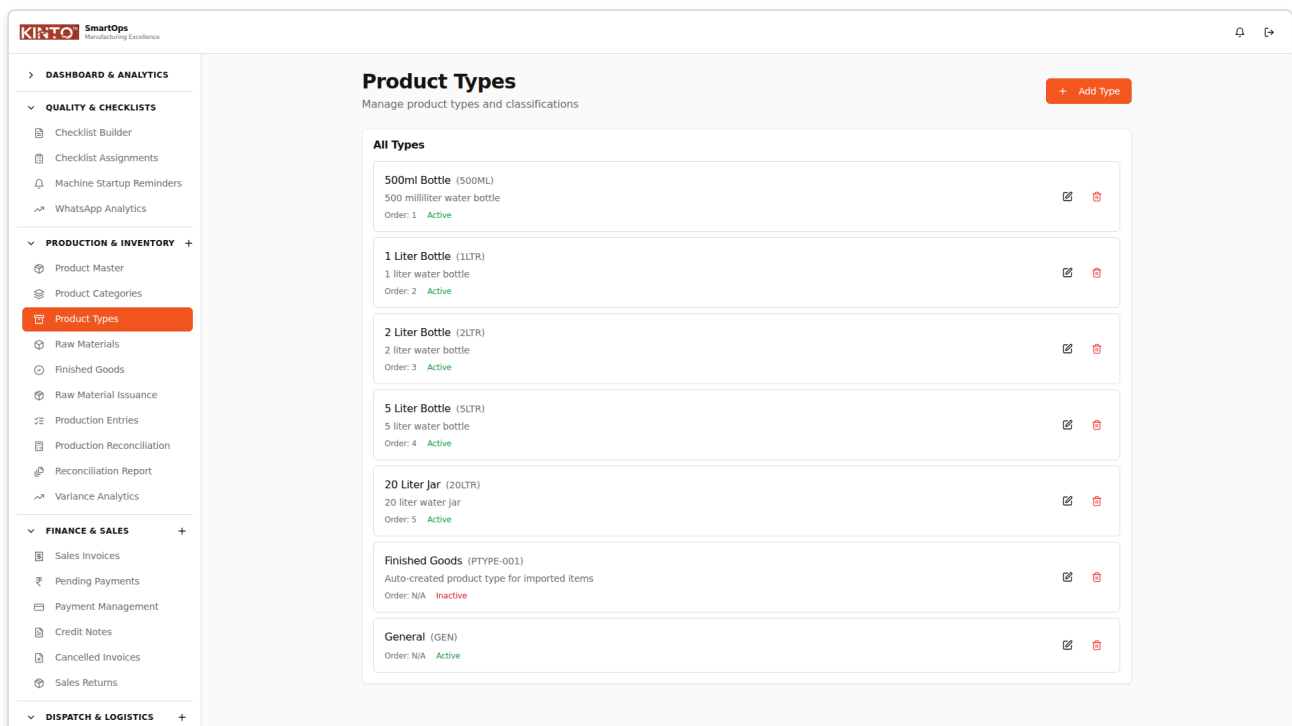

Product Categories

Organize products into logical categories for easy management.

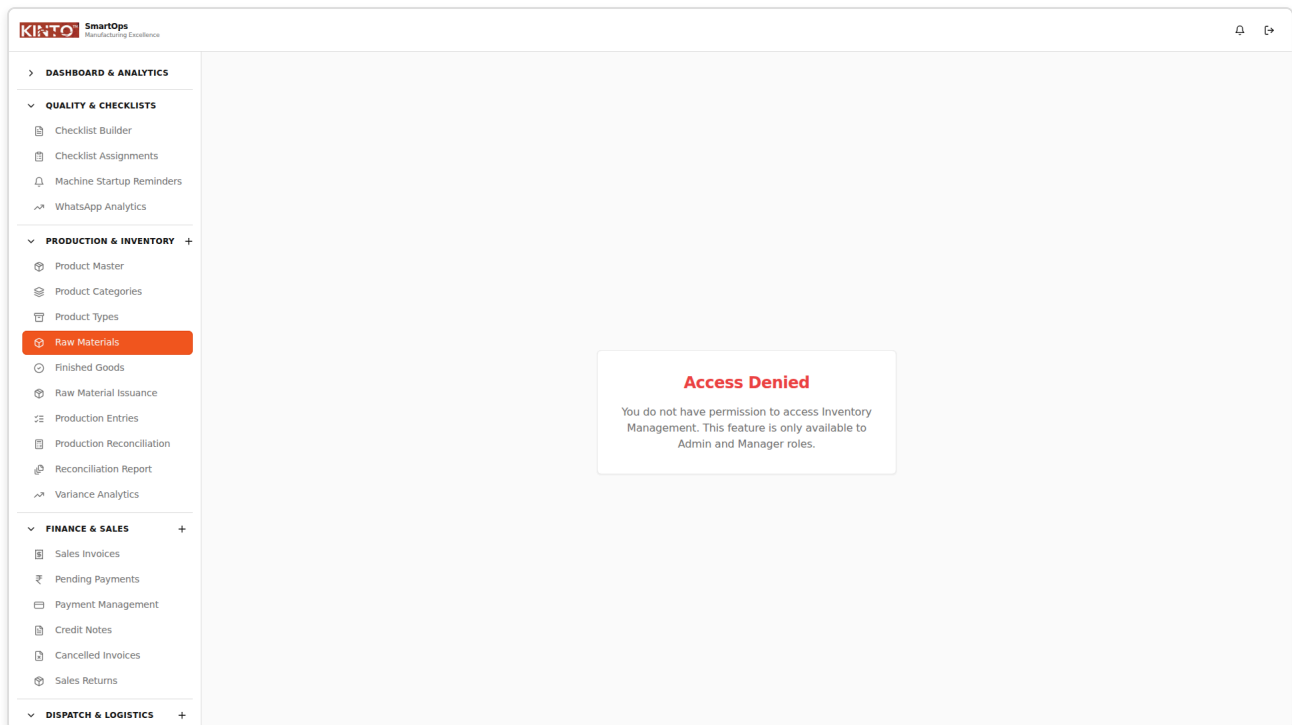

Product Types

Define product types within each category.

Raw Materials

Manage your raw material inventory and specifications.

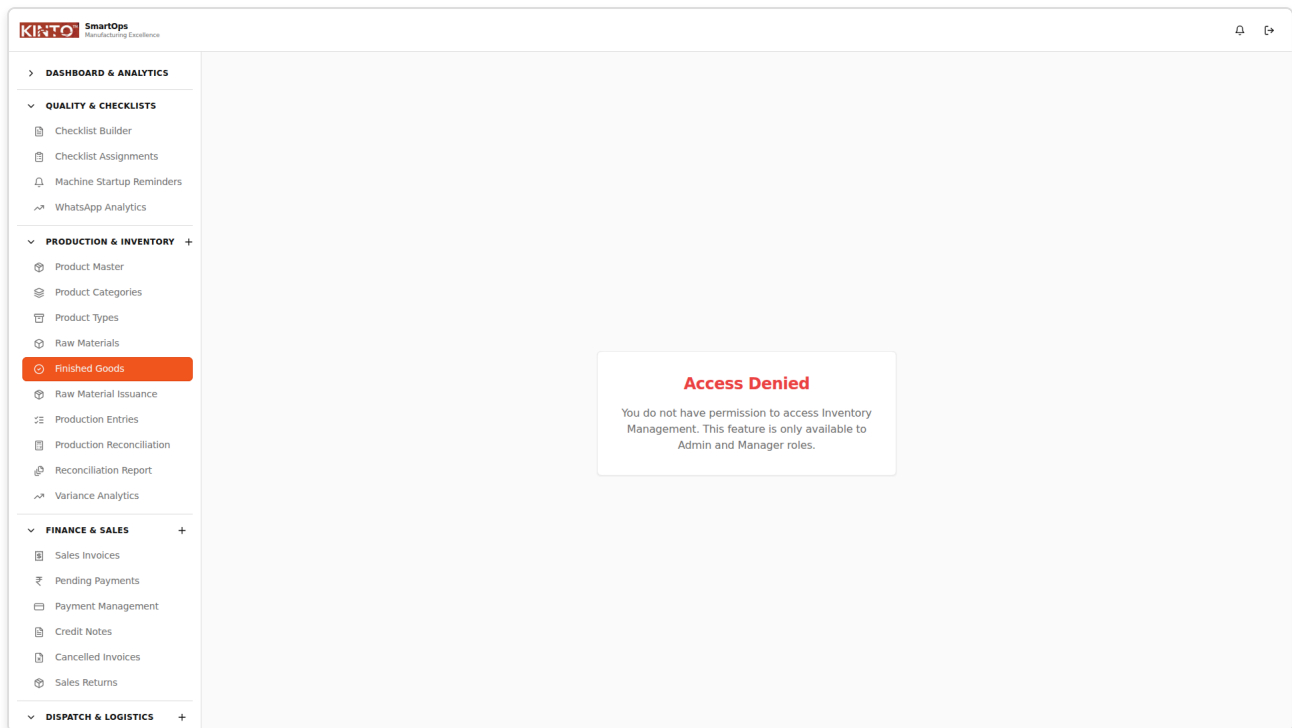

Capabilities:

- Track raw material stock levels
- Set reorder points
- Define conversion factors
- Manage supplier information

Finished Goods

Track finished goods inventory and quality status.

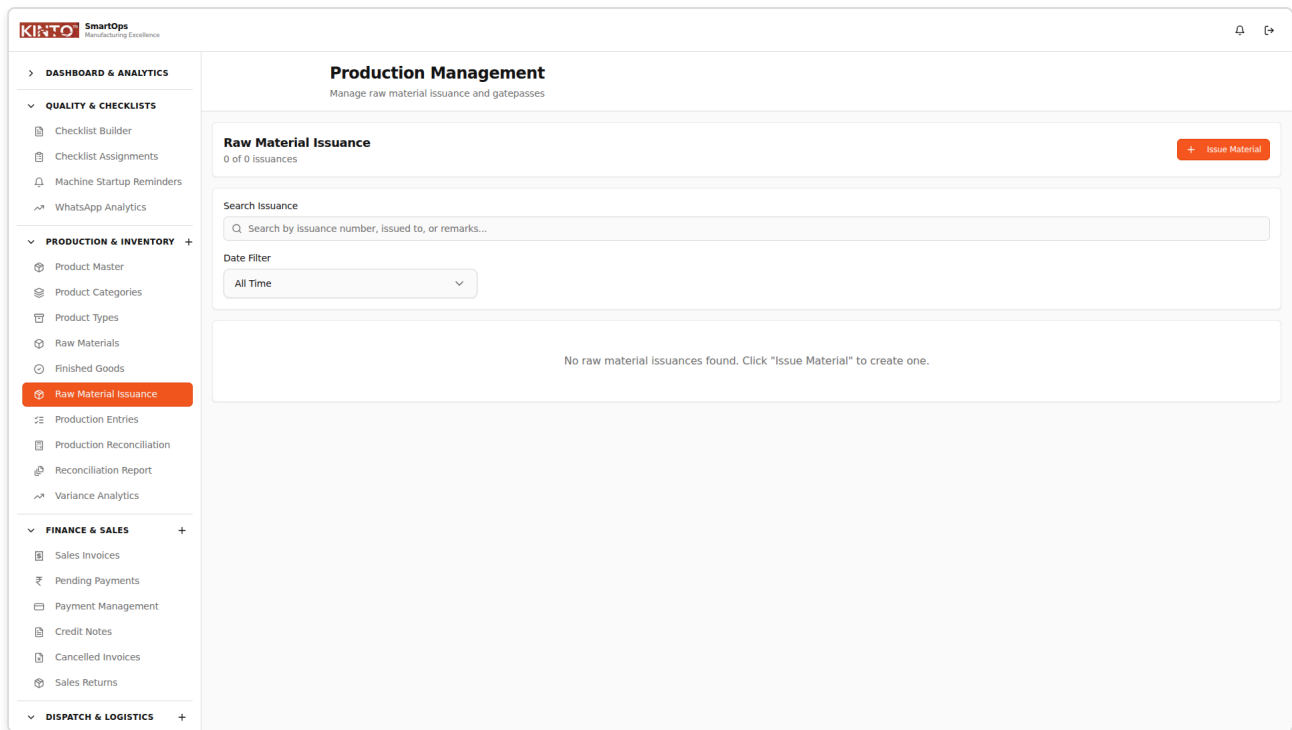

Features:

- View current stock levels
- Quality approval status
- Batch tracking
- Location management

Raw Material Issuance

Issue raw materials to production with BOM-based suggestions.

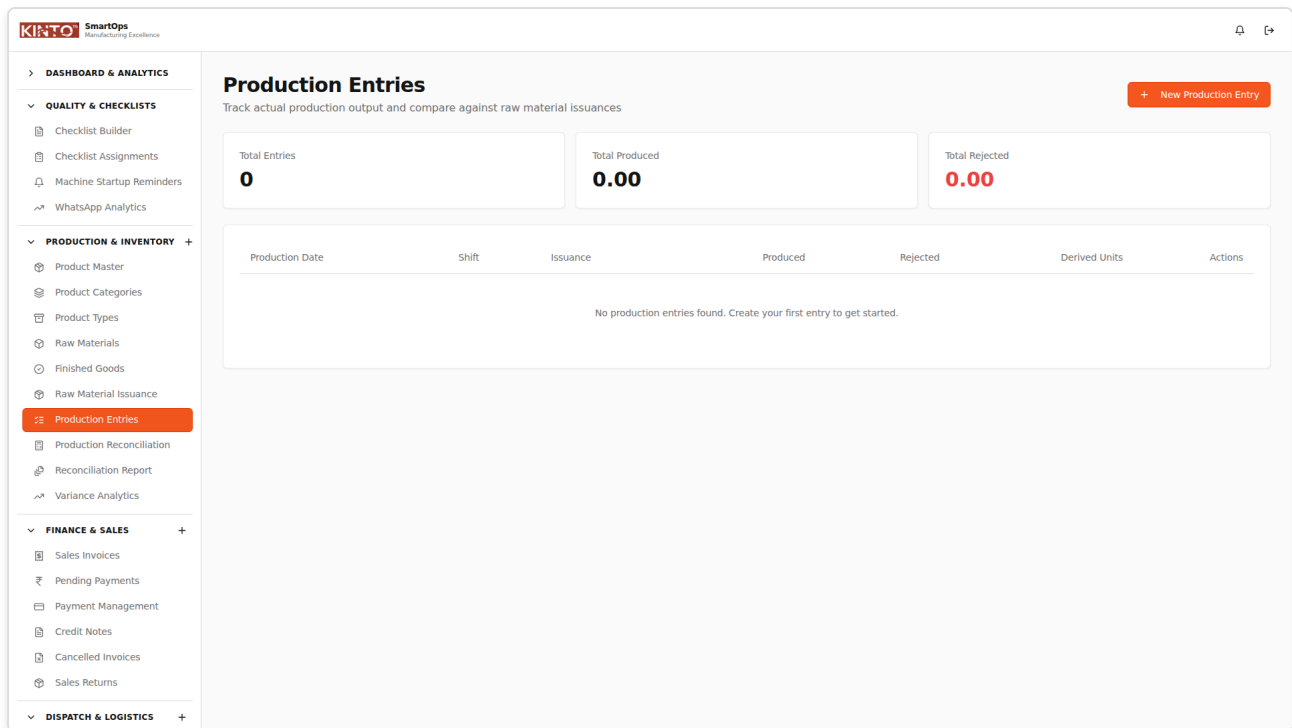

Process:

- Select the product to be manufactured
- Enter production quantity
- System calculates required raw materials based on BOM
- Adjust quantities if needed
- Confirm issuance to deduct from inventory

Production Entries

Record daily production with quality metrics.

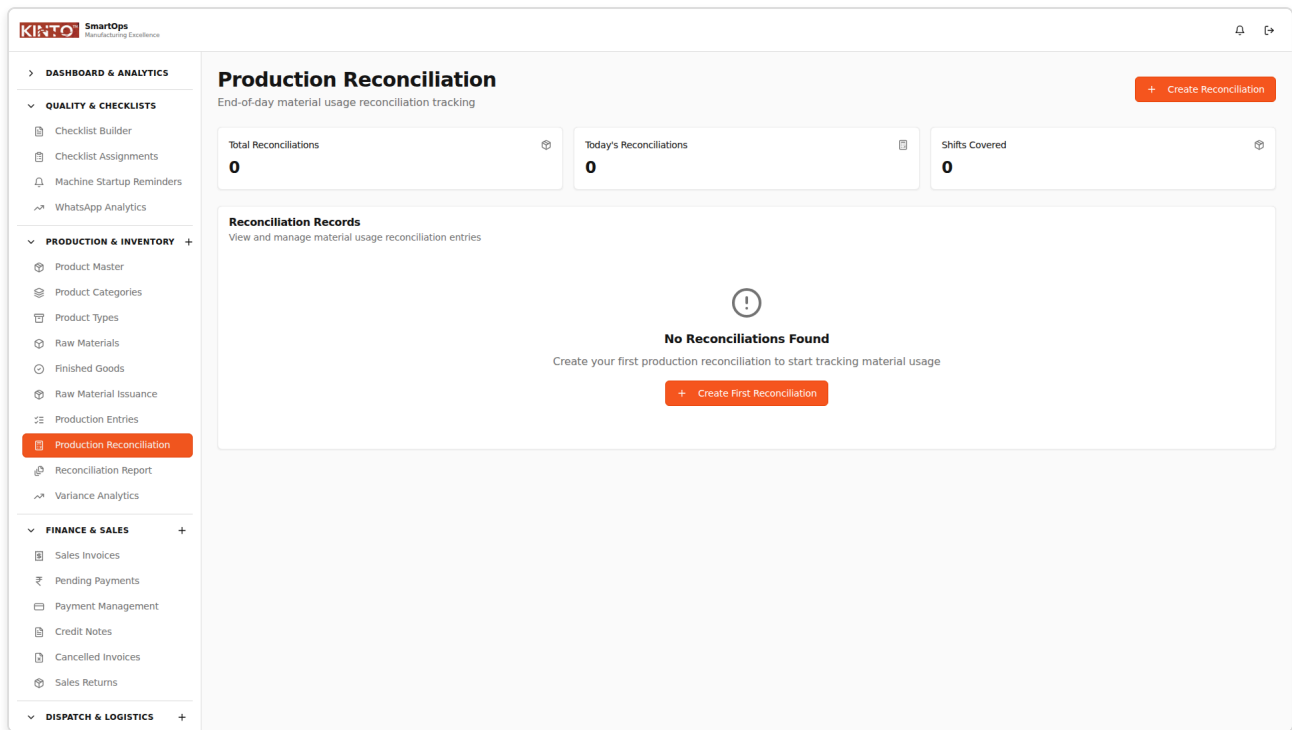

Data Captured:

- Product produced
- Quantity manufactured
- Machine used
- Operator name
- Quality grade
- Any defects or issues

Production Reconciliation

End-of-day reconciliation of production vs material usage.

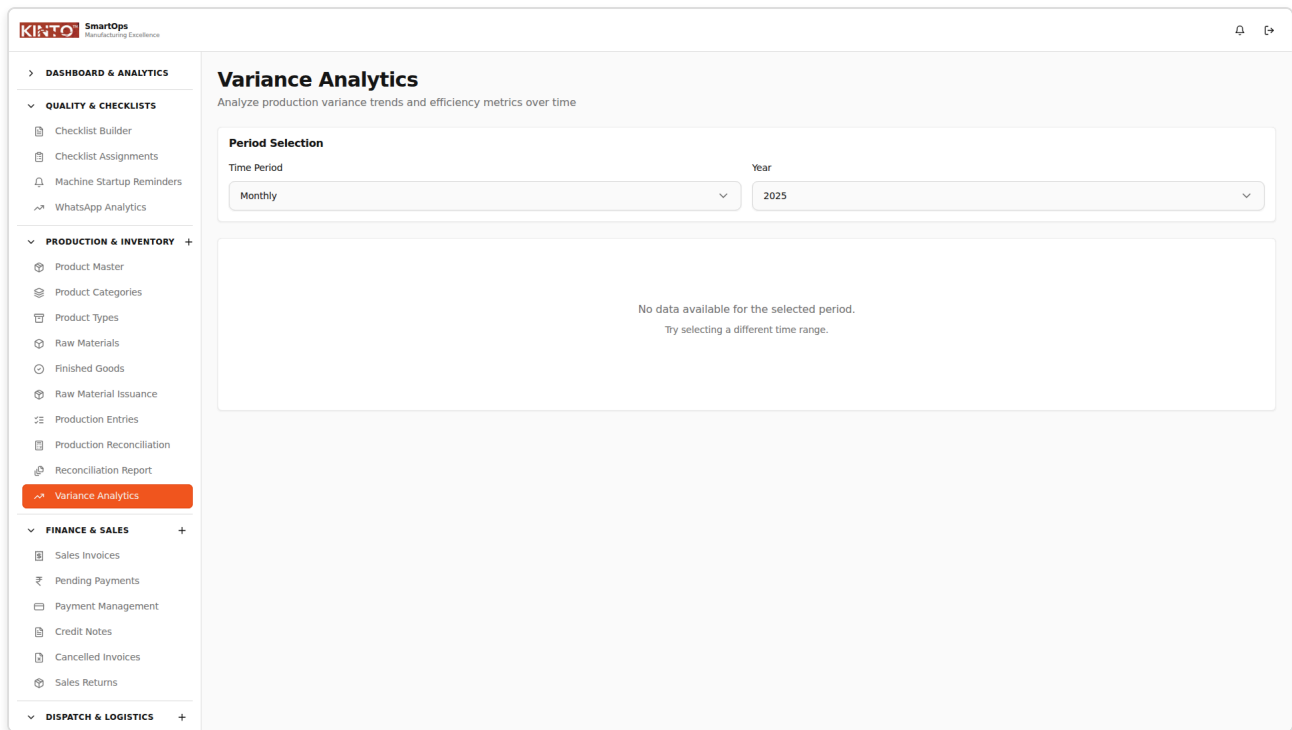

Reconciliation Process:

- Review daily production totals
- Compare actual vs expected material consumption
- Document any variances with explanations
- Submit for approval

Variance Analytics

Analyze production variances and identify improvement opportunities.

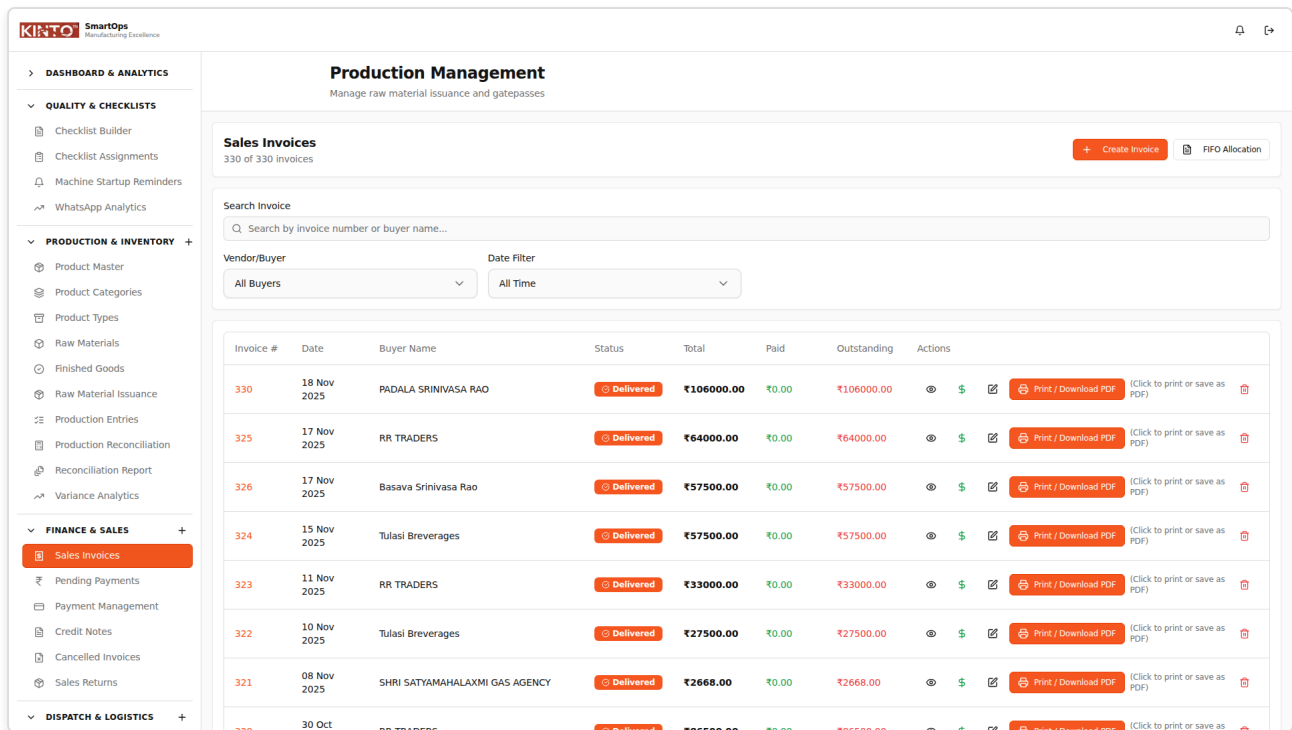

Analytics Include:

- Material usage variance trends
- Machine-wise efficiency comparison
- Product-wise yield analysis
- Cost impact of variances

Finance & Sales

Sales Invoices

Create and manage sales invoices with GST compliance.

Invoice Features:

- GST-compliant invoice generation
- Multiple tax rates support
- Automatic total calculation
- Print and email options
- Invoice cancel and reissue capability

Pending Payments

Track outstanding payments from customers.

Information Displayed:

- Invoice number and date
- Customer name
- Total amount and pending amount
- Days overdue
- Payment reminder status

Payment Management

Record and allocate payments against invoices.

Payment Features:

- FIFO-based payment allocation
- Multiple payment modes (Cash, Bank, UPI, Cheque)
- Partial payment support
- Payment receipt generation
- Payment write-off capability (Admin only)

Credit Notes

View and manage credit notes issued to customers.

Displayed Information:

- Original invoice details
- Cancellation reason
- Replacement invoice link (if any)
- Cancelled by and date

Sales Returns

Process customer returns with quality segregation workflow.

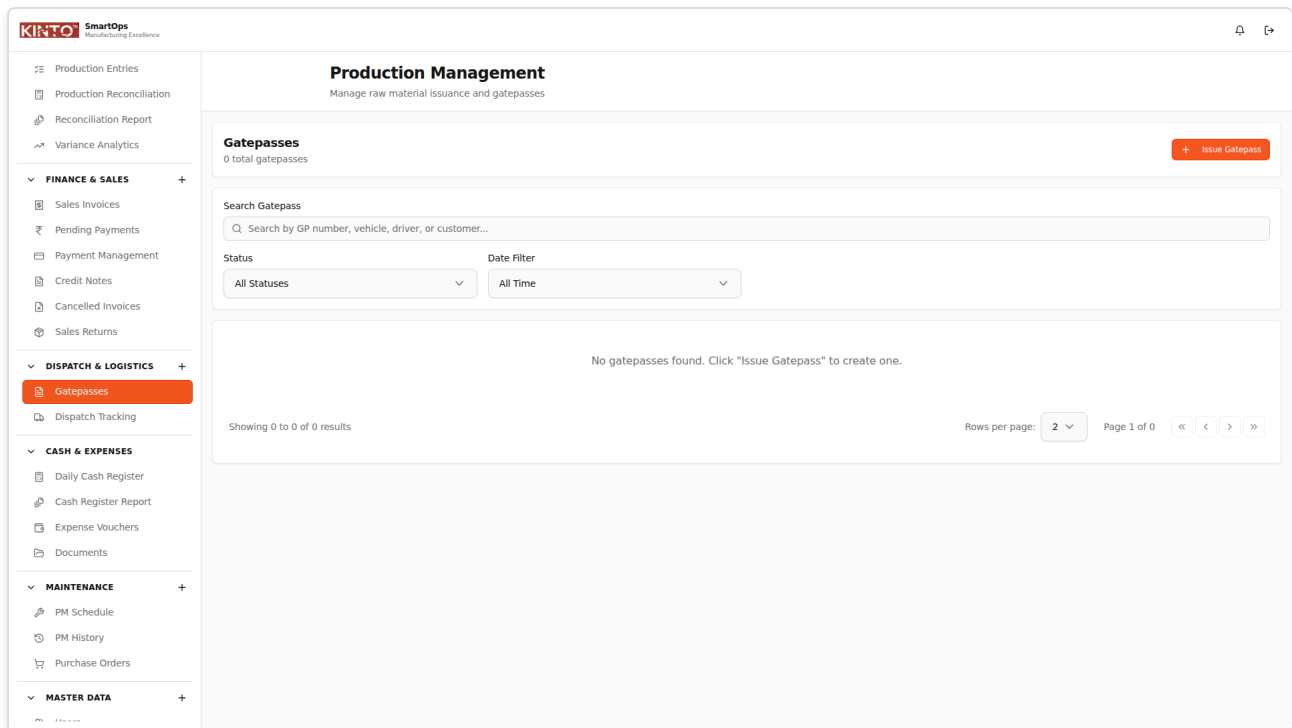

Returns Process:

- Create return request
- Receive goods and quality check
- Segregate: Resaleable, Repairable, or Scrap
- Update inventory accordingly
- Generate credit note if applicable

Dispatch & Logistics

Gatepasses

Create gatepasses for goods leaving the facility.

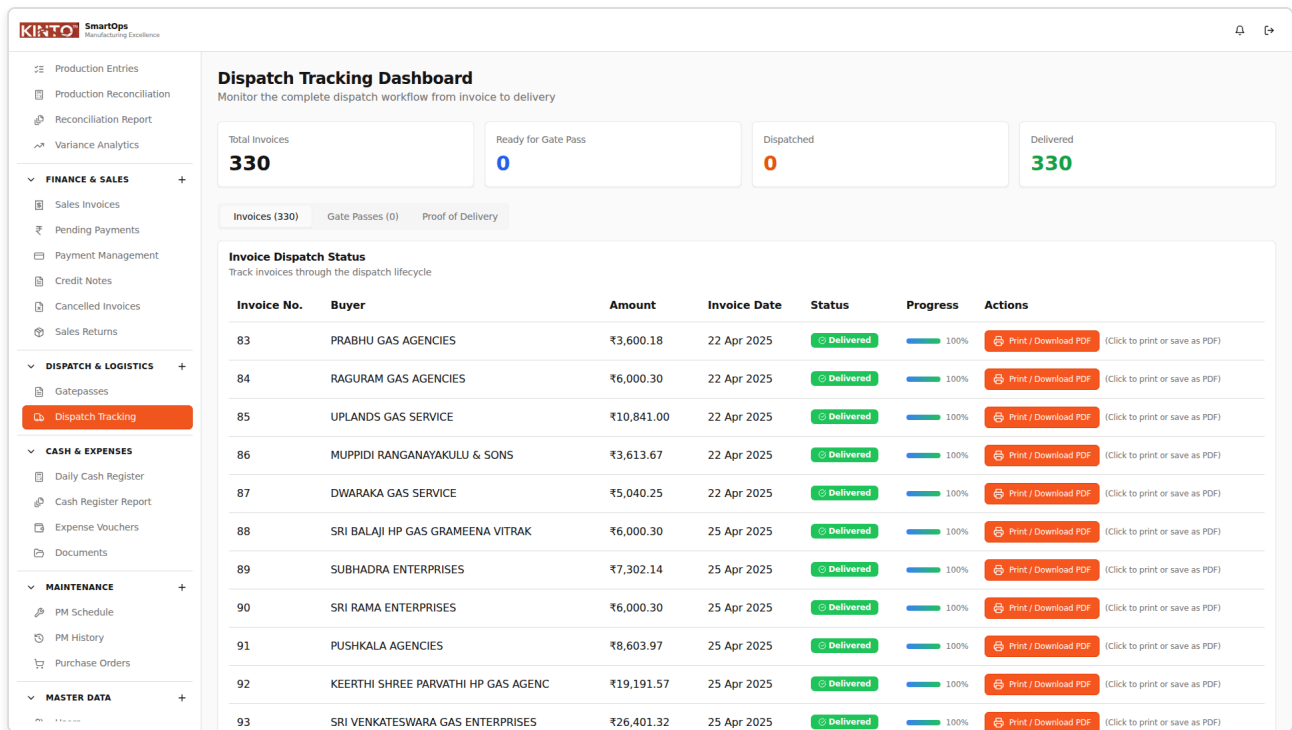

Important Notes:

- Invoice must be created before gatepass
- Gatepass creation deducts inventory
- Gatepass cancellation returns inventory

Dispatch Tracking

Track the 5-stage dispatch workflow from invoice to delivery.

Dispatch Stages:

- **Invoice Created** - Initial stage
- **Gatepass Created** - Ready for dispatch
- **Dispatched** - Vehicle left facility
- **In Transit** - On the way to customer
- **Delivered** - Proof of delivery received

Cash & Expenses

Daily Cash Register

Track daily business cash flow with comprehensive ledger entries.

Features:

- **Opening Balance:** Automatically carried forward from previous day
- **Cash Received:** Record receipts by source type
 - Sale Cash - Secondary Sale - UPI - Bank Transfer - Other
- **Expenses:** Record daily expenses with instant voucher generation
- **Transfers:** Record cash transfers out of register
- **Closing Balance:** Auto-calculated using formula:

Closing = Opening + Cash Received - Expenses - Transfers

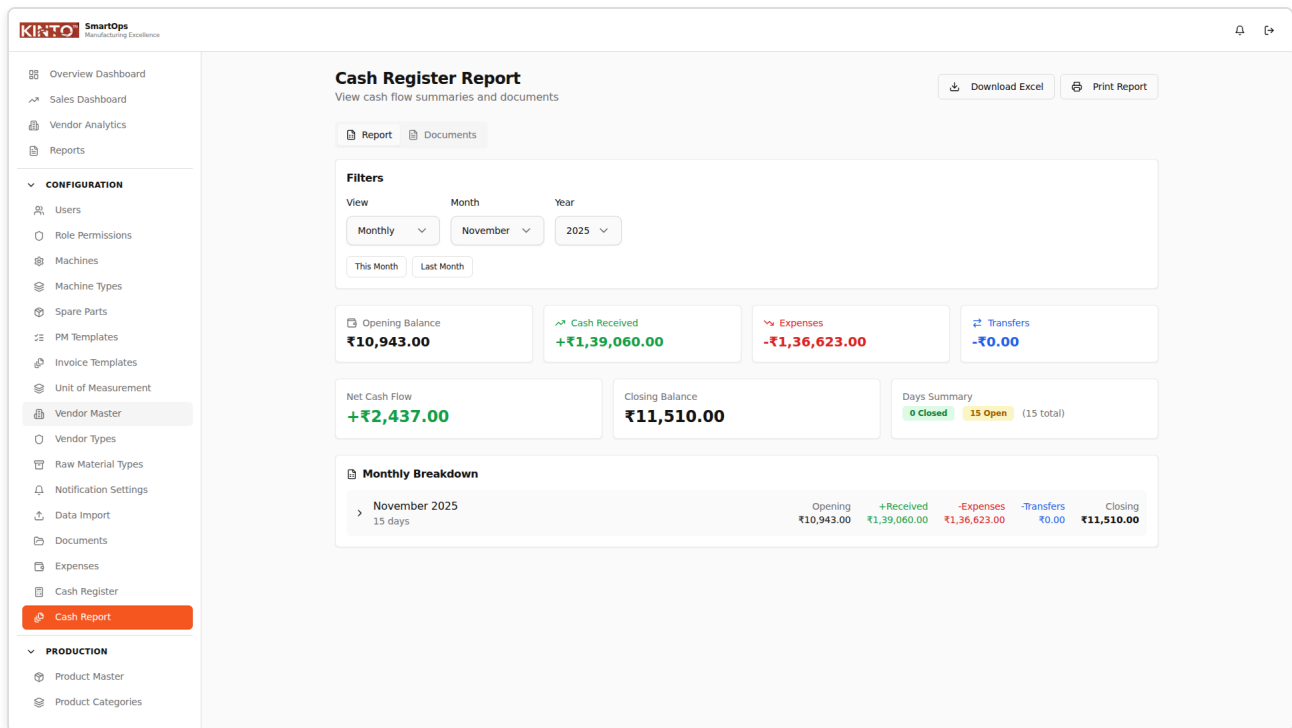

Reconciliation

Workflow:

- Enter actual cash on hand
- System calculates variance (Expected vs Actual)
- If variance exists, enter explanation
- Submit reconciliation
- Day is closed and locked

Cash Register Report

View historical cash register entries with export capability.

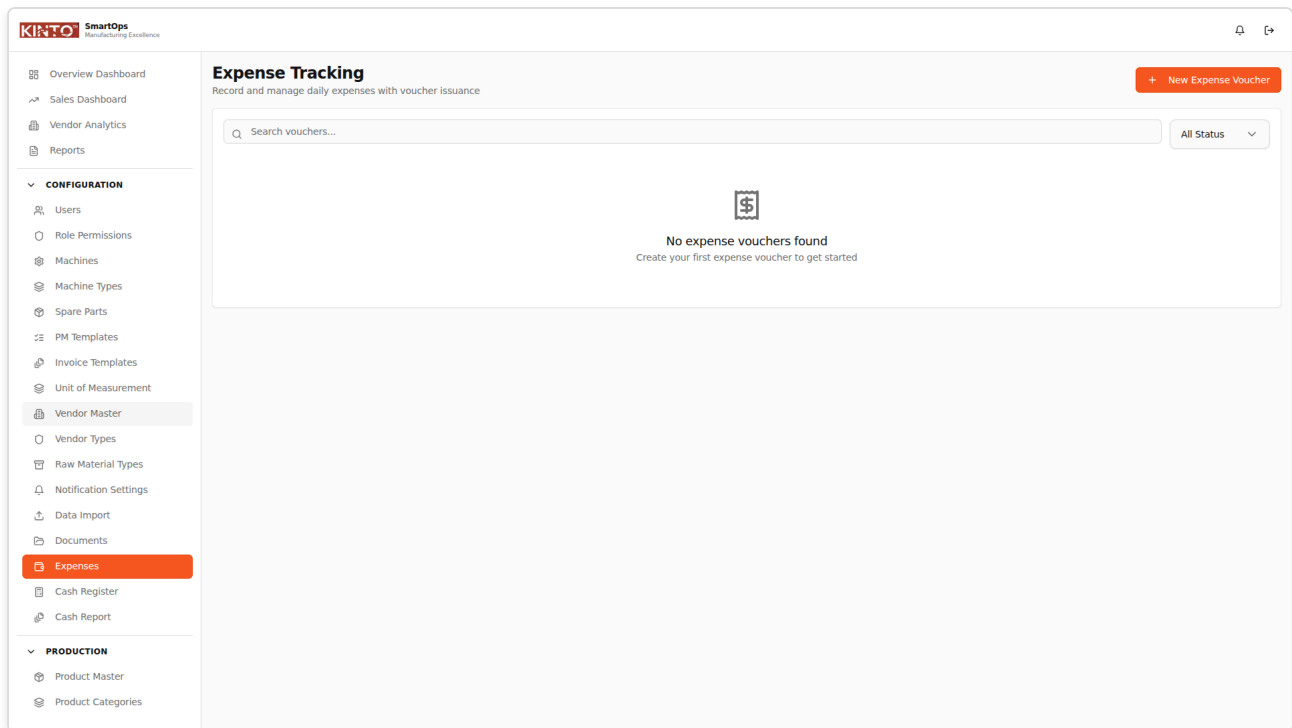

Report Features:

- Date range filtering
- Summary totals
- Excel export
- Variance highlighting
- Detailed line item view

Expense Vouchers

Manage expense vouchers with approval workflow.

Expense Workflow:

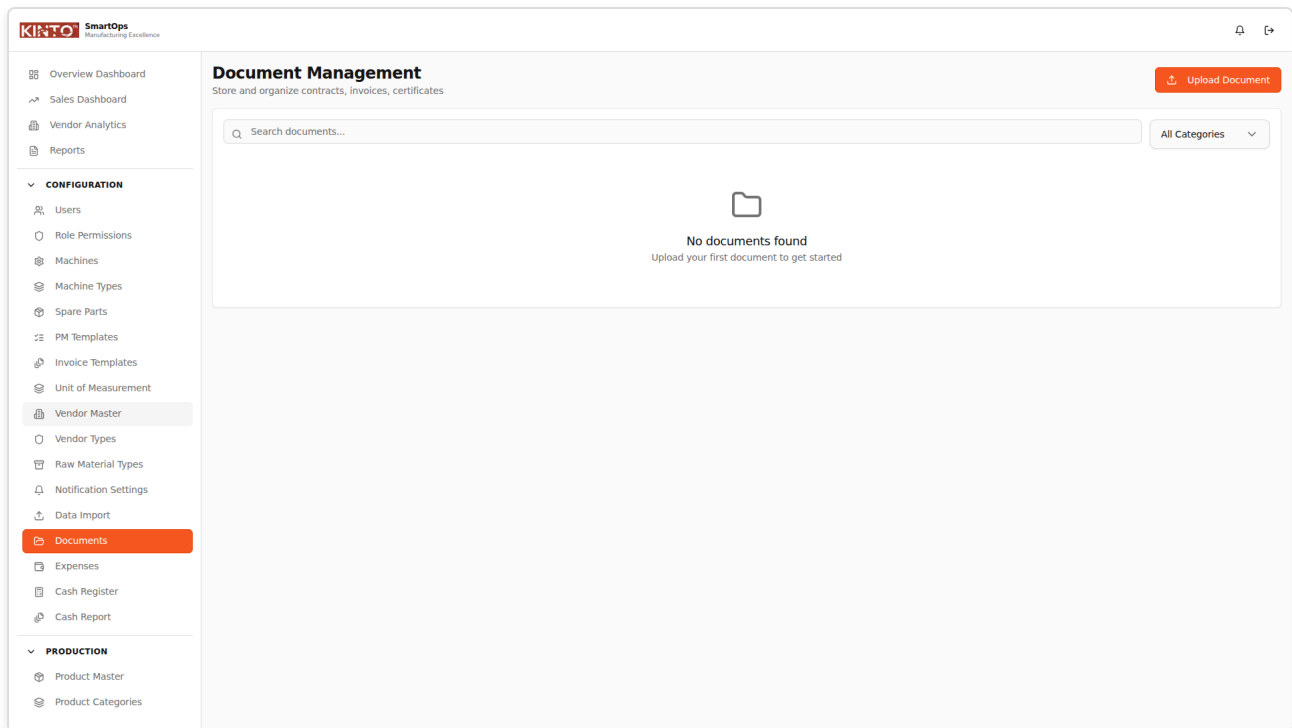

- **Draft** - Create expense voucher
- **Submitted** - Send for approval
- **Approved/Rejected** - Manager decision
- **Paid** - Payment confirmed

Voucher Features:

- Multiple line items per voucher
- Expense category assignment
- GST handling
- Payment mode tracking
- A5-sized print format (2 per A4 page)
- Signature boxes for Receiver, Cashier, Approved By

Documents

Store and manage business documents with expiry tracking.

Document Management Features:

- Category-based organization
- Expiry date tracking with color-coded alerts
- Link to vendors or invoices
- Bulk download (ZIP)
- Sharing capabilities
- Automated expiry notifications via WhatsApp and Email

Maintenance

PM Schedule

View preventive maintenance schedule for all machines.

Note: This screen may require specific navigation access based on your role.

PM History

Track completed preventive maintenance activities.

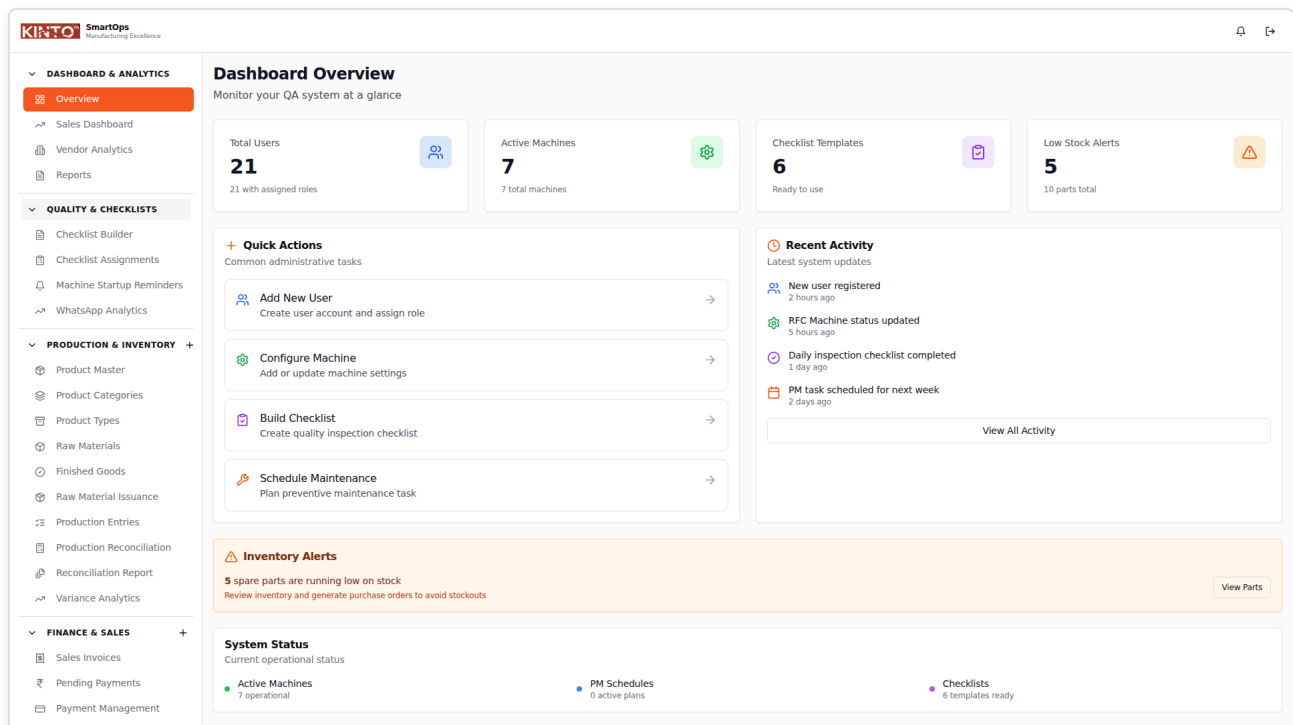

Tracked Information:

- Maintenance date and type
- Machine details
- Tasks completed
- Parts replaced
- Next due date

Master Data

Users

Manage system users and their credentials.

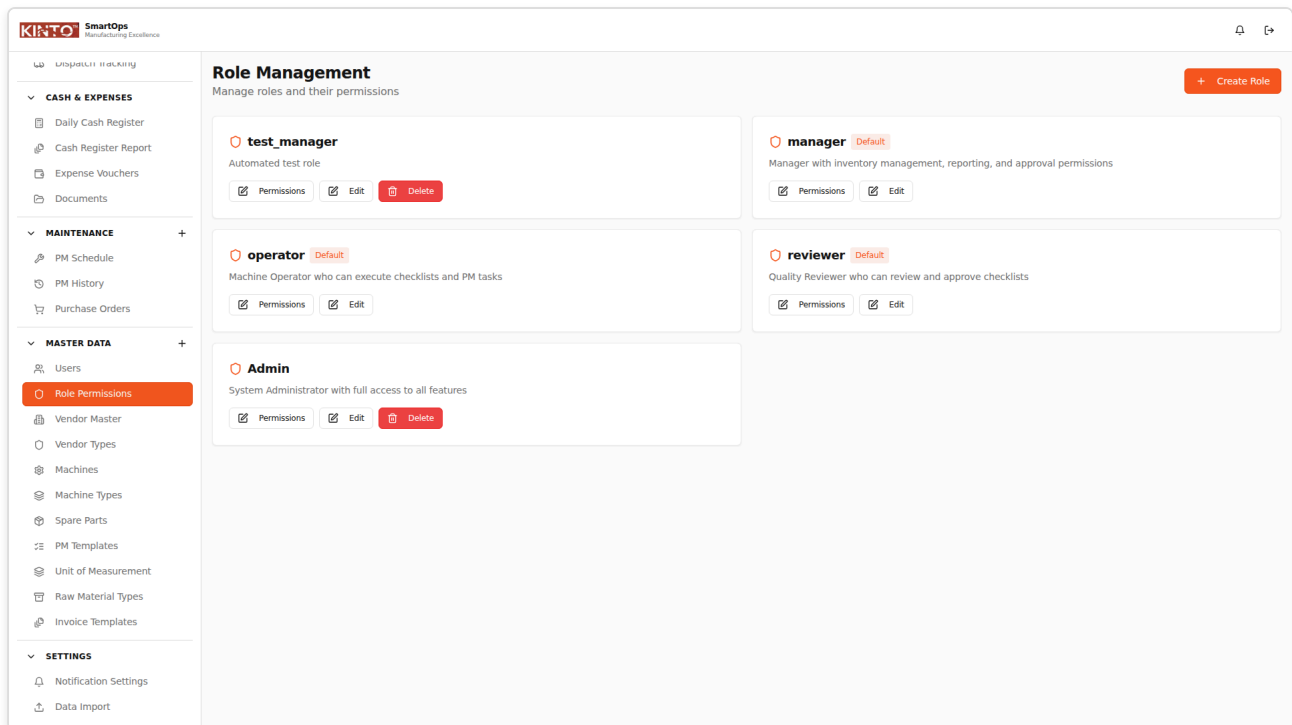

User Management:

- Create new users
- Set roles and permissions
- Enable/disable accounts
- Reset passwords

Role Permissions

Configure access permissions for each role across all 50 system screens.

Permission Levels:

- **None** - No access to the screen
- **View** - Can view but not modify
- **Edit** - Can view and modify data

Vendor Master

Manage vendor information and classification.

SETTINGS

Notification Settings

Data Import

Notification Settings

Configure email and WhatsApp notifications for machine startup reminders

On-Premise Deployment Setup

For production use, you can configure notification settings here OR set environment variables on your server:

SENDGRID_API_KEY - SendGrid API key for email

WHATSAPP_PHONE_NUMBER_ID - Meta WhatsApp Phone Number ID

WHATSAPP_ACCESS_TOKEN - Meta WhatsApp Access Token

WHATSAPP_VERIFY_TOKEN - Webhook verification token (required)

Database settings take precedence over environment variables.

Email Notifications

Configure email notifications via SendGrid or Office 365 SMTP

Email Provider

Sender Email Address

test@kinto.com

This email must be verified in your SendGrid account

Sender Name

KINTO QA

SendGrid Setup: You need a SendGrid account and API key. Set SENDGRID_API_KEY environment variable.

WhatsApp Notifications (Meta Business Cloud API)

Configure WhatsApp via Meta Business Cloud API (2.4x cheaper, FREE service conversations)

Meta Phone Number ID

123456789012345

Get this from Meta Business Manager under WhatsApp > API Setup

Meta Access Token

Configurable Notifications:

- Machine startup reminders
- Checklist assignment alerts
- Payment reminders
- Document expiry alerts
- Order confirmations

Data Import

Import data from external systems like Vyapaar.

Vyapaar Data Import

Upload Excel files from Vyapaar to migrate your data

[Clear All Data](#)

🔍 Important Information

This will clear existing data and import fresh data from Vyapaar Excel files. You can either upload 3 separate files (Party Report, Sale Report, Item Details) OR 2 files if your Sale Report contains an "Item Details" sheet.

Upload Excel Files

Select the Excel exports from Vyapaar (Item Details is optional if included in Sale Report)

Party Report (Vendors/Customers)

Choose File No file chosen

Sale Report (Invoices)

Choose File No file chosen

Item Details Report (Products) - Optional

Only needed if not included as a sheet in Sale Report

Choose File No file chosen

⬆ Start Import

How to Export from Vyapaar

- 📄 **Party Report**
Go to Reports → Party Report → Export to Excel
- 📄 **Sale Report**
Go to Reports → Sale Report → Export to Excel
- 📄 **Item Details Report**
Go to Reports → Item Details → Export to Excel

Import Features:

- Excel-based data import
- Fuzzy matching for vendors
- Intelligent date conversion
- Automatic vendor type classification
- Comprehensive error handling

Support
