Getting Started

Login

Access the KINTO Smart Ops system through your web browser. Enter your username and password to log in.

Login Page

Steps to Login: 1. Enter your username in the “Username” field 2. Enter your password in the “Password” field 3. Click the “Login” button 4. If you forgot your password, click “Forgot your password?” to reset it

Navigation

After logging in, you’ll see the main dashboard with a sidebar navigation menu on the left. The sidebar is organized into 9 collapsible modules:

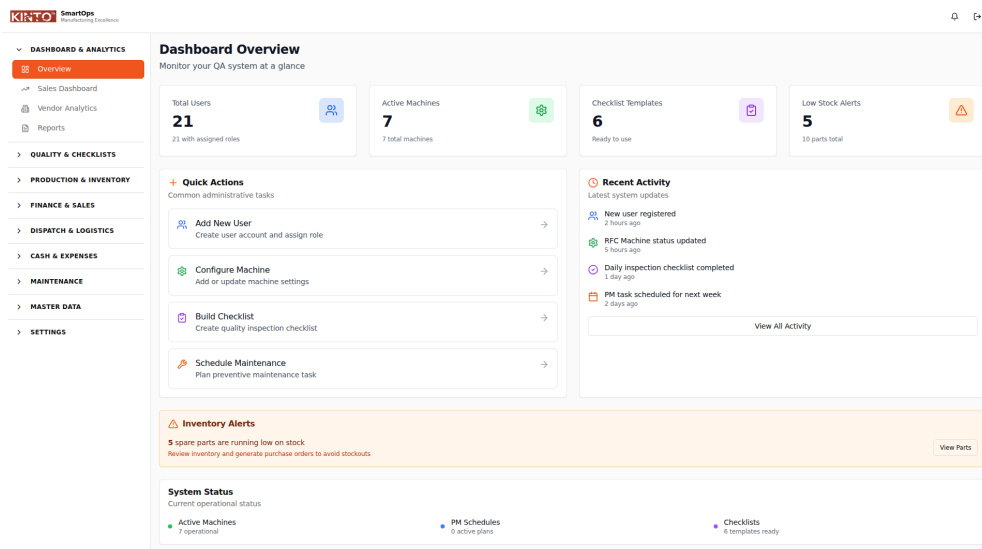

- **Dashboard & Analytics** - View business performance metrics
- **Quality & Checklists** - Manage quality control checklists
- **Production & Inventory** - Track production and inventory
- **Finance & Sales** - Handle invoices, payments, and credit notes
- **Dispatch & Logistics** - Manage gatepasses and dispatch tracking
- **Cash & Expenses** - Daily cash register and expense management
- **Maintenance** - Preventive maintenance scheduling
- **Master Data** - Manage products, vendors, and machines
- **Settings** - System configuration and user management

Click on any module header to expand or collapse its menu items.

Dashboard & Analytics

Overview Dashboard

The Overview Dashboard provides a comprehensive view of your business operations at a glance.

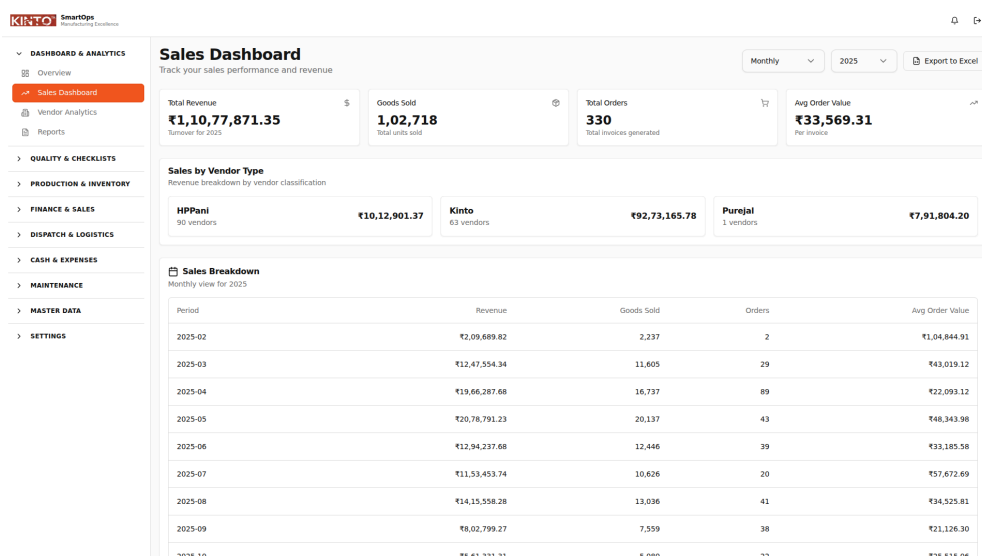

Overview Dashboard

Key Features: - Today's production summary - Pending quality checks count - Open gatepasses and dispatch status - Recent activity timeline - Quick action buttons for common tasks

Sales Dashboard

Monitor your sales performance with detailed analytics and charts.

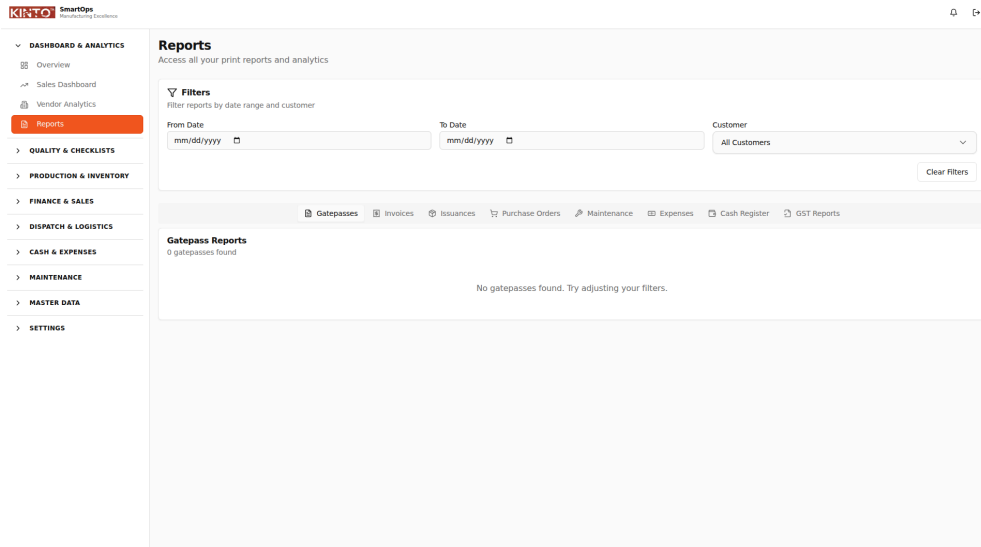

Sales Dashboard

Available Information: - Monthly sales trends - Top selling products - Customer-wise revenue breakdown - Payment collection status - Outstanding receivables summary

Reports

Access comprehensive reports for business analysis and decision making.

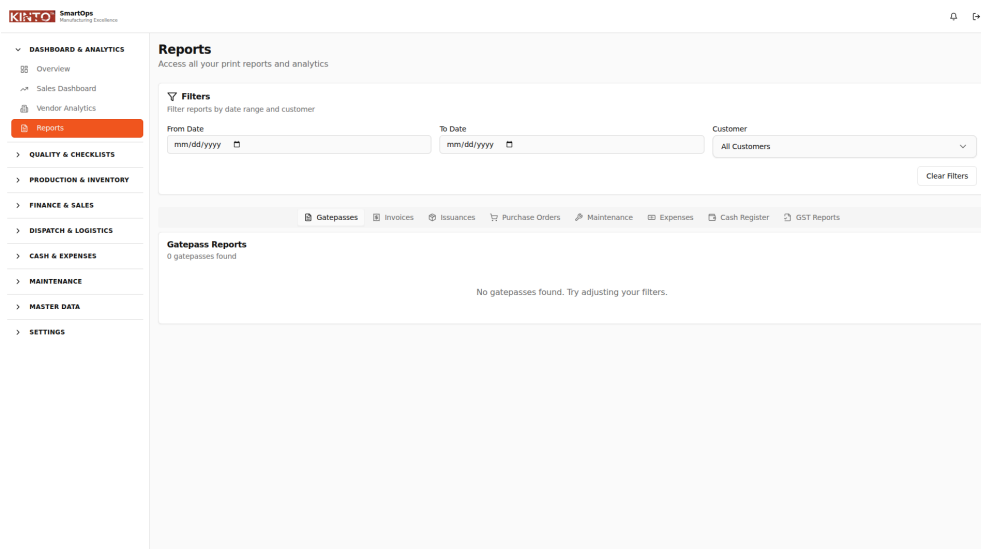

Reports

The Reports module provides detailed business analytics with powerful filtering and export capabilities. Each report is accessible from **Dashboard & Analytics → Reports** in the sidebar.

GST Reports (GSTR-1 & GSTR-3B)

Generate GST-compliant reports for tax filing.

GST Reports

Navigation: Dashboard & Analytics → Reports → GST Reports tab

Available Report Types: - **GSTR-1** - Outward supplies (sales invoices)
- **GSTR-3B** - Summary return with tax liability

Filters: | Filter | Options | Description | |———|———|———| | Report Type | GSTR-1, GSTR-3B | Select the GST return type | | Period Type | Monthly, Quarterly, Annual | Filing frequency | | Start Date | Date picker

| Beginning of report period | | End Date | Date picker | End of report period | | Customer | Dropdown | Filter by specific customer (optional) |

How to Generate: 1. Select the Report Type (GSTR-1 or GSTR-3B) 2. Choose the Period Type 3. Set the date range using Start Date and End Date 4. Optionally filter by Customer 5. Click **“Generate Report”** button

Report Sections (GSTR-1): - B2B Invoices (Business to Business with GSTIN) - B2C Large Invoices (Above Rs. 2.5 Lakhs) - B2C Small Invoices (Below Rs. 2.5 Lakhs) - Credit/Debit Notes - HSN Summary

Export Options: - **Excel** - Download as .xlsx file with multiple sheets - **JSON** - Download raw data for integration

Pending Payments Report

Track outstanding invoice payments and aging analysis.

Invoice Number	Date	Customer	Total Amount	Paid	Outstanding	Status	Actions
1	27-Feb-2025	BrowAnts Innovations	₹128132.71	₹76381.00	₹51751.71	60% Paid	⊕ ⊖

Cancelled Invoices

Navigation: Finance & Sales → Cancelled Invoices

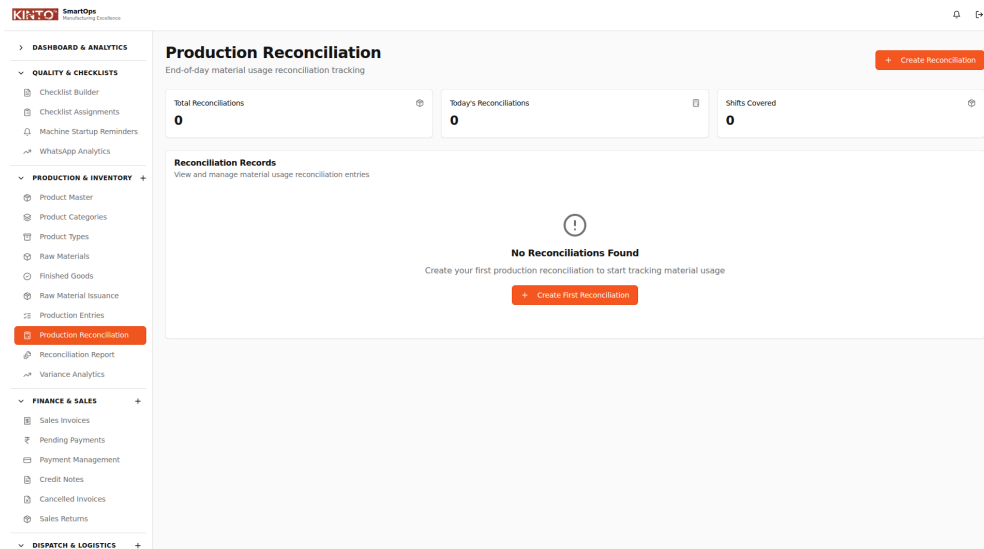

Filters: | Filter | Options | Description | |——|———|———| | |
Cancellation Date | From/To dates | Date range when invoices were cancelled | | Buyer Search | Text search | Search by buyer name | | Invoice Number | Text search | Search by invoice number |

How to Generate: 1. Navigate to Cancelled Invoices page 2. Set the cancellation date range 3. Optionally search by buyer or invoice number 4. View list with cancellation details

Report Features: - Original invoice details - Cancellation date and reason - Link to replacement invoice (if reissued) - Click “View” to see full invoice details

Production Reconciliation Report

Analyze material usage vs production output with variance tracking.

Production Reconciliation

Navigation: Dashboard & Analytics → Production Reconciliation Report

Filters: | Filter | Options | Description | |----|----|-----| | Date From | Date picker | Start date of production period | | Date To | Date picker | End date of production period | | Product | Dropdown | Filter by specific product | | Batch | Dropdown | Filter by production batch | | Shift | Day/Night/All | Filter by production shift |

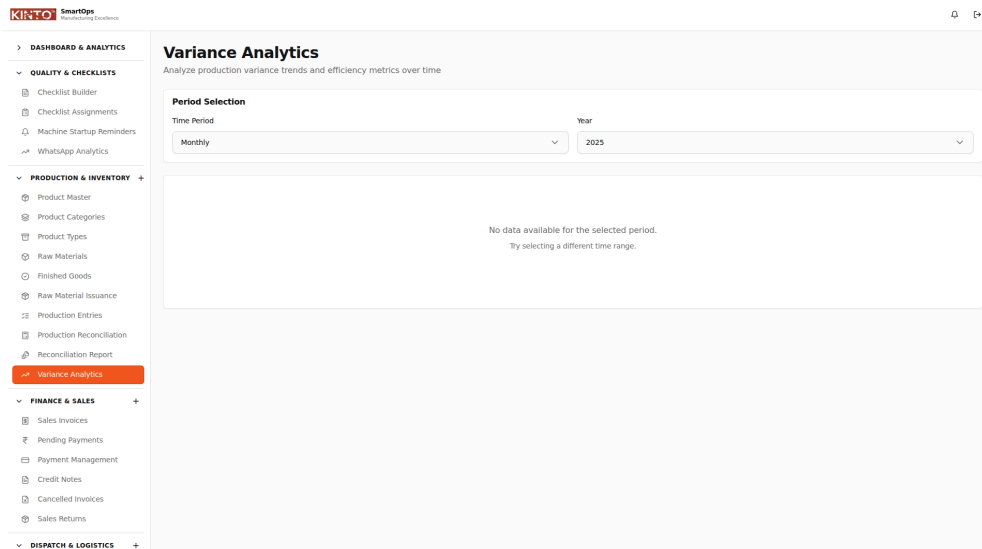

How to Generate: 1. Navigate to Production Reconciliation Report 2. Set the date range 3. Optionally filter by Product, Batch, or Shift 4. Click **“Generate Report”** button

Report Sections: - Reconciliation summary cards - Material-wise breakdown - Variance percentage analysis - Efficiency metrics

Export Options: - **Excel** - Download detailed report with all materials

Variance Analytics Dashboard

Visual analytics for production efficiency trends.

Variance Analytics

Navigation: Dashboard & Analytics → Variance Analytics

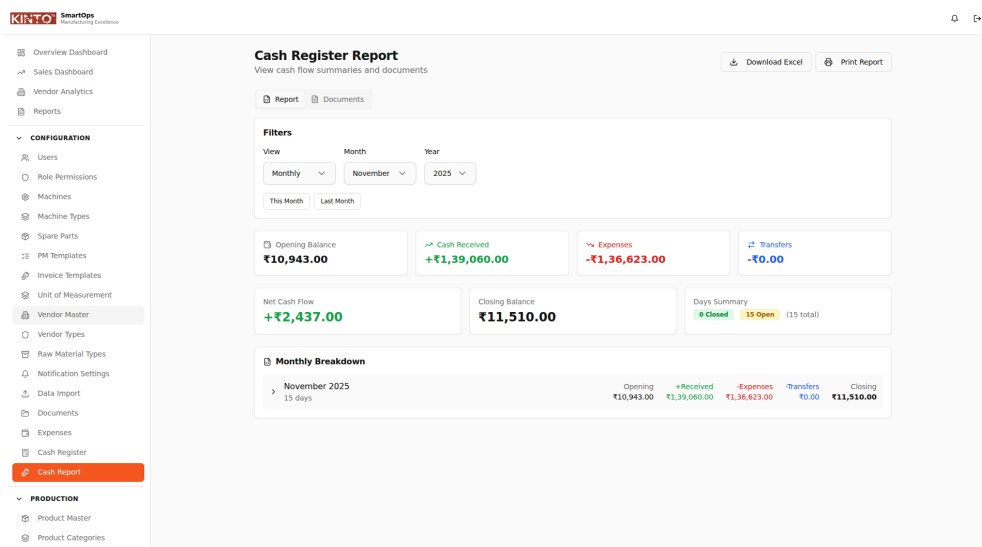

Filters: | Filter | Options | Description | |----|----|-----| | Time Period | Last 7 days, 30 days, 90 days, Custom | Analysis period | | Product | Dropdown | Filter by specific product | | Material | Dropdown | Filter by raw material |

How to Generate: 1. Navigate to Variance Analytics 2. Select the time period 3. Optionally filter by product or material 4. Charts update automatically

Dashboard Features: - Trend charts showing variance over time - Product-wise efficiency comparison - Material usage patterns - Alerts for high variance items

Cash Register Report

Daily cash flow summary with transaction details.

Cash Register Report

Navigation: Cash & Expenses → Cash Register Report

Filters: | Filter | Options | Description | |----|----|-----| | Date From | Date picker | Start date of report period | | Date To | Date picker | End date of report period | | Salesperson | Dropdown | Filter by salesperson (optional) | | Status | Open/Closed/All | Day status filter |

How to Generate: 1. Navigate to Cash Register Report 2. Set the date range 3. Optionally filter by salesperson or status 4. View summary and detailed transactions

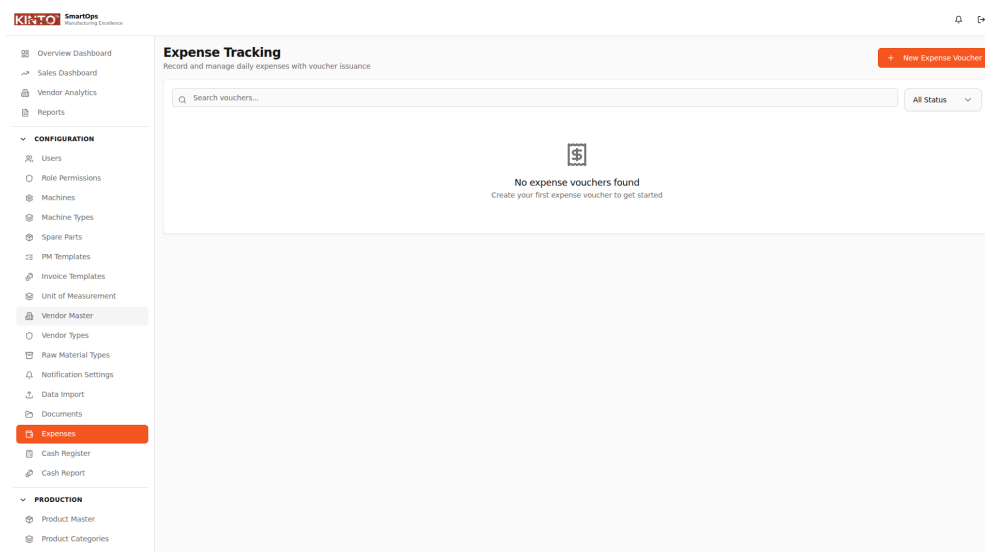

Report Features: - Daily summary with opening/closing balances - Transaction-wise breakdown (cash received, expenses, transfers) - Variance highlighting (discrepancies in red) - Linked voucher numbers for expenses

Export Options: - **Excel** - Download complete cash register data

Print Vouchers: - Click **“Print Vouchers”** to print A5-sized expense vouchers - 2 vouchers per A4 page - Includes signature boxes

Expense Summary Report

Consolidated view of all expenses with category breakdown.

Expense Vouchers

Navigation: Cash & Expenses → Expenses (with filters)

Filters: | Filter | Options | Description | |----|----|-----| | Date From | Date picker | Start date | | Date To | Date picker | End date | | Category | Dropdown | Expense category | | Status |

Draft/Submitted/Approved/Rejected/Paid | Voucher status | | Payment Mode | Cash/Bank/UPI/Cheque | Payment method | | Payee | Search box | Search by vendor/payee name |

How to Generate: 1. Navigate to Expenses page 2. Apply filters as needed 3. View filtered list with summary totals

Report Features: - Summary cards showing totals by status - Category-wise breakdown - GST summary - Payment mode distribution

Export Options: - **Excel** - Download expense data with all details

Dispatch Tracking Report

Monitor invoice dispatch status through the delivery workflow.

Invoice No.	Buyer	Amount	Invoice Date	Status	Progress	Actions

Quality & Checklists

Checklist Builder

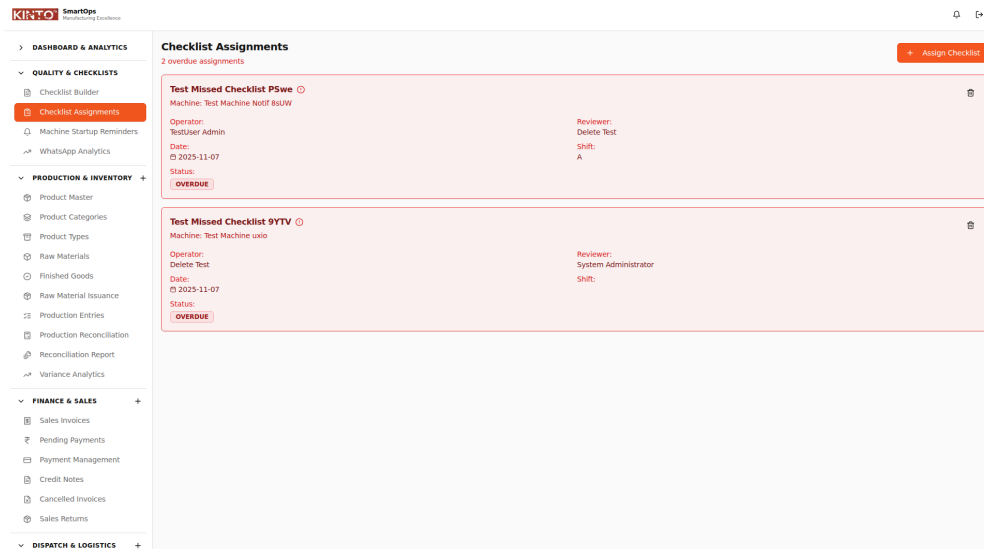

Create and manage quality control checklists for various processes.

Checklist Builder

Features: - Create custom checklists with multiple question types - Set up approval workflows - Define checklist frequency (daily, weekly, monthly) - Assign checklists to specific machines or processes

Checklist Assignments

View and manage checklist assignments across machines and operators.

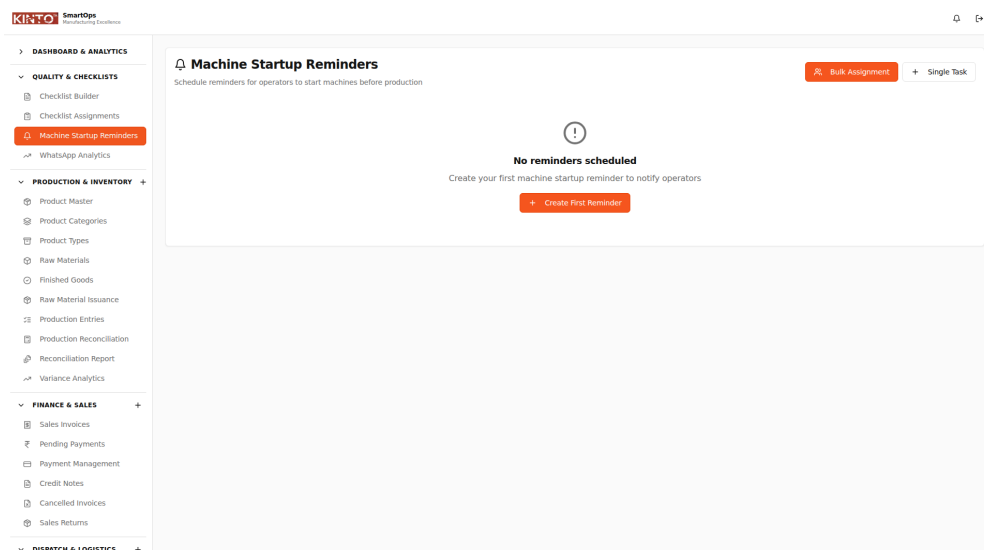

Checklist Assignments

Capabilities: - View pending checklists - Assign operators to checklists
- Track completion status - Review submitted responses

Machine Startup Reminders

Configure automated WhatsApp reminders for machine startup checklists.

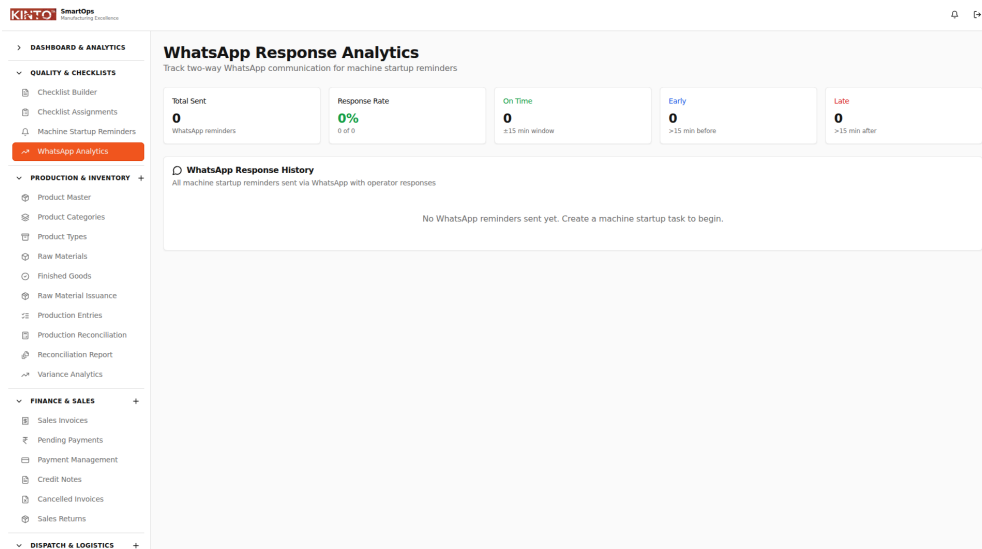

Machine Startup Reminders

Configuration Options: - Set reminder times for each machine -
Configure WhatsApp notification preferences - Enable/disable reminders per machine - Set escalation paths for missed checklists

WhatsApp Analytics

Monitor WhatsApp integration performance and message delivery statistics.

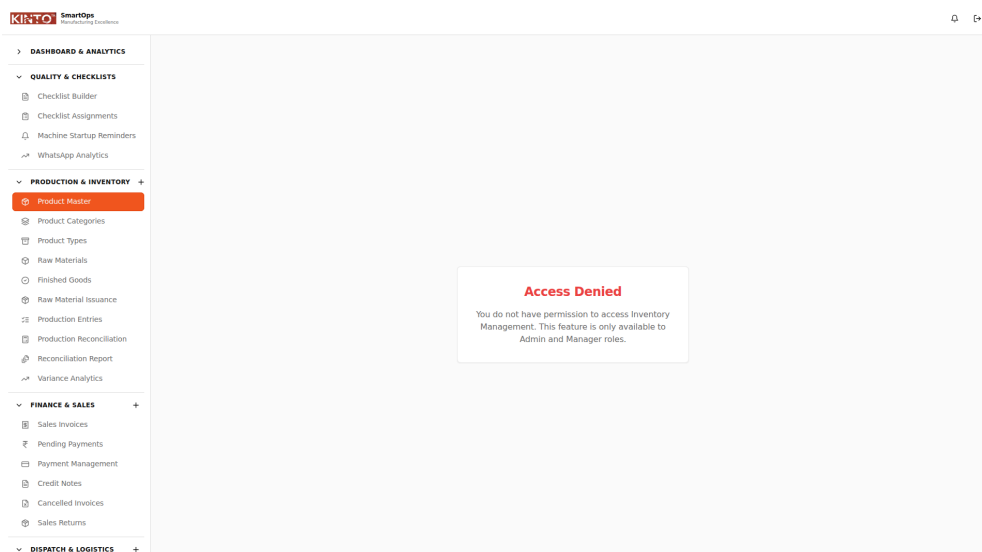

WhatsApp Analytics

Tracked Metrics: - Messages sent vs delivered - Response rates - Checklist completion via WhatsApp - Failed message analysis

Production & Inventory

Product Master

Manage your product catalog with detailed specifications and Bill of Materials.

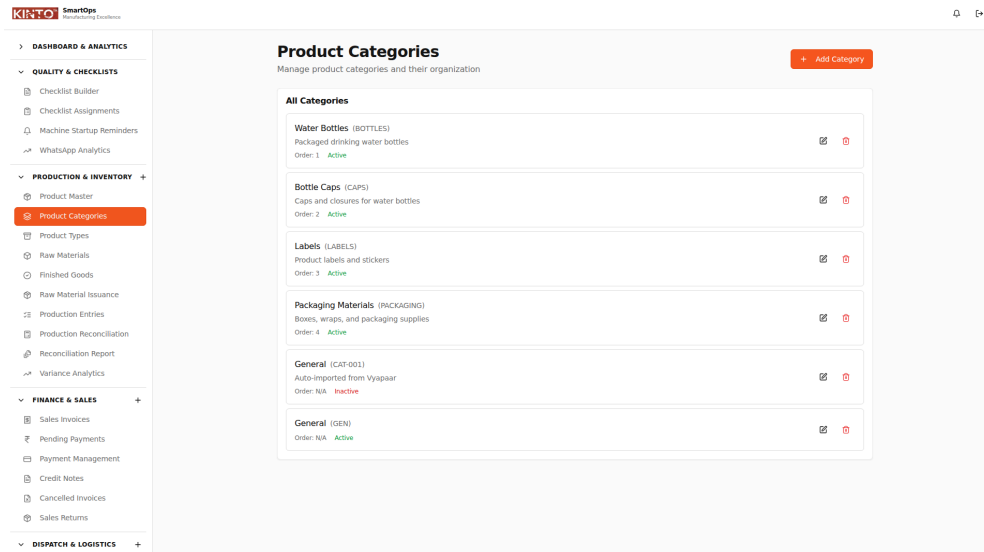

Product Master

Features: - Add/edit products with full specifications - Define Bill of Materials (BOM) for each product - Set standard production quantities - Link products to raw materials

Product Categories

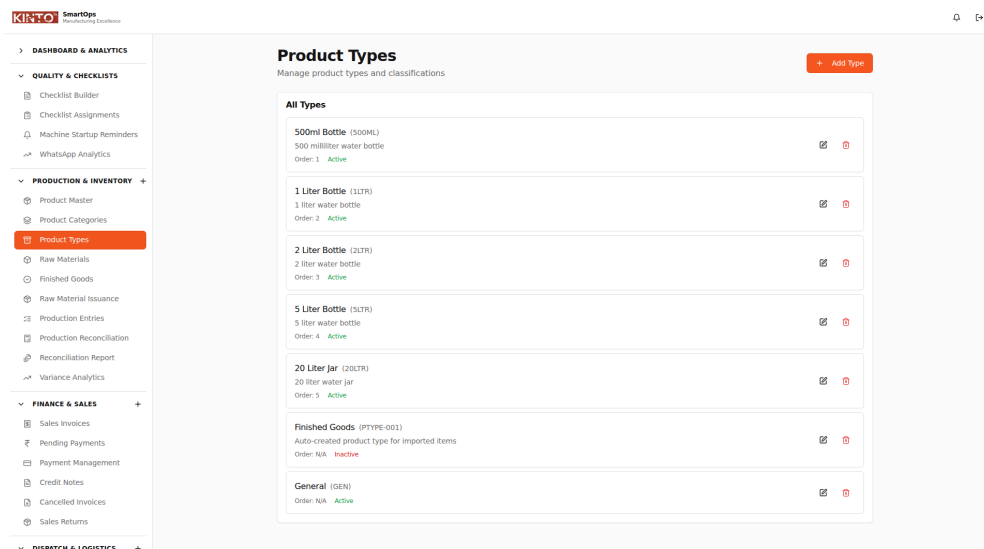

Organize products into logical categories for easy management.

Product Categories

Product Types

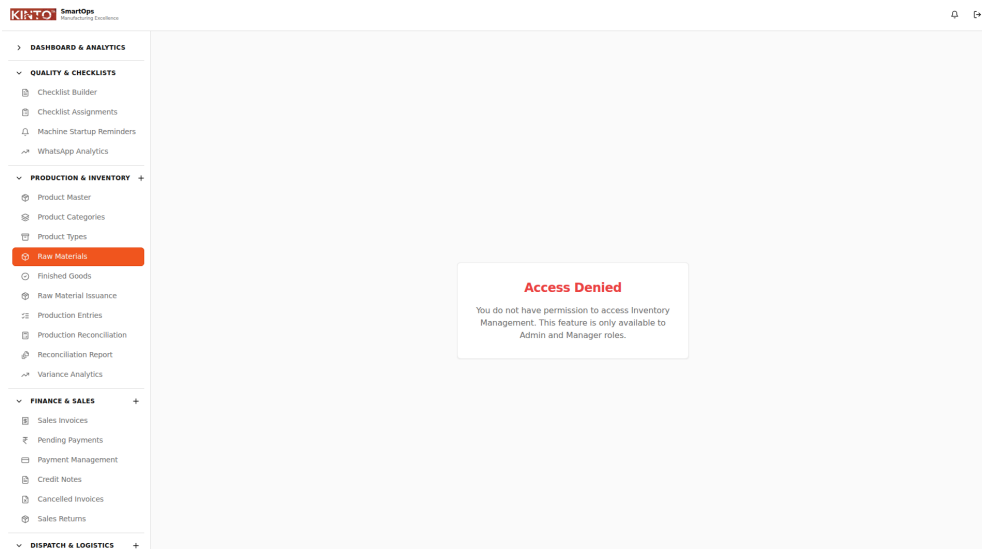

Define product types within each category.

Product Types

Raw Materials

Manage your raw material inventory and specifications.

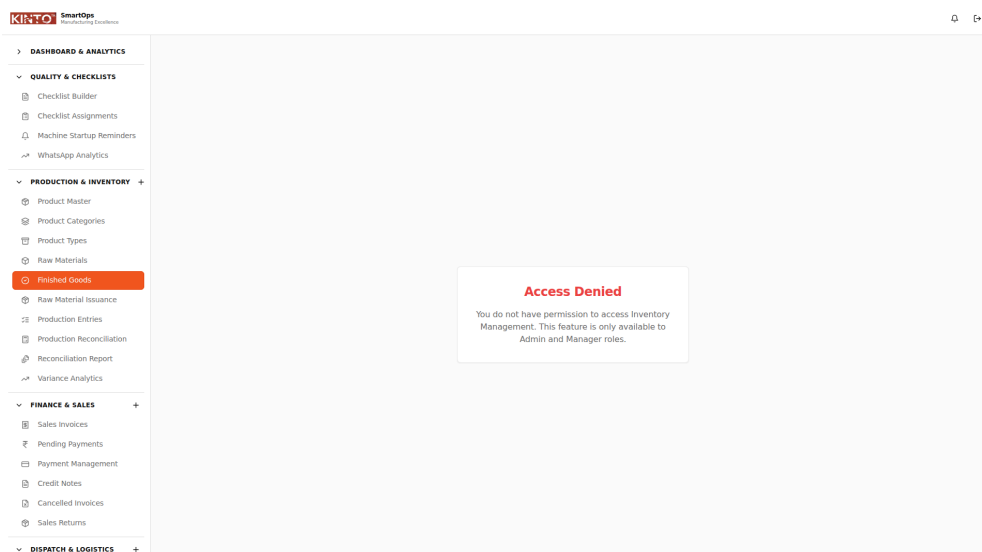

Raw Materials

Capabilities: - Track raw material stock levels - Set reorder points - Define conversion factors - Manage supplier information

Finished Goods

Track finished goods inventory and quality status.

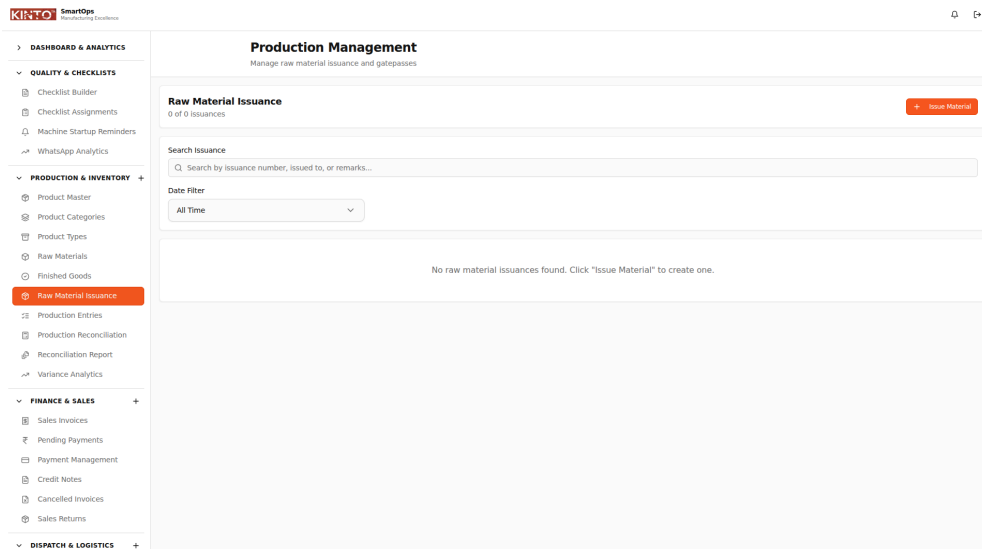

Finished Goods

Features: - View current stock levels - Quality approval status - Batch tracking - Location management

Raw Material Issuance

Issue raw materials to production with BOM-based suggestions.

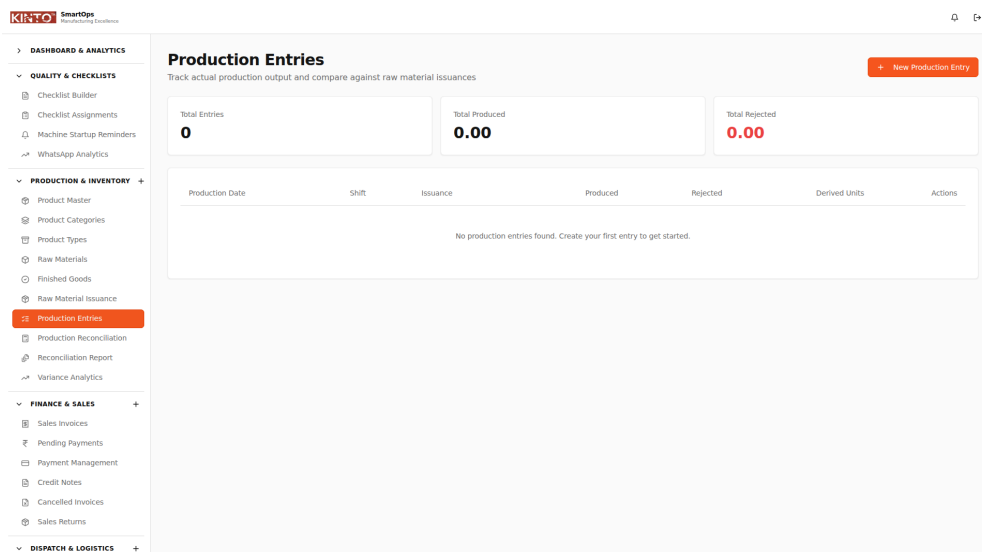

Raw Material Issuance

Process: 1. Select the product to be manufactured 2. Enter production quantity 3. System calculates required raw materials based on BOM 4. Adjust quantities if needed 5. Confirm issuance to deduct from inventory

Production Entries

Record daily production with quality metrics.

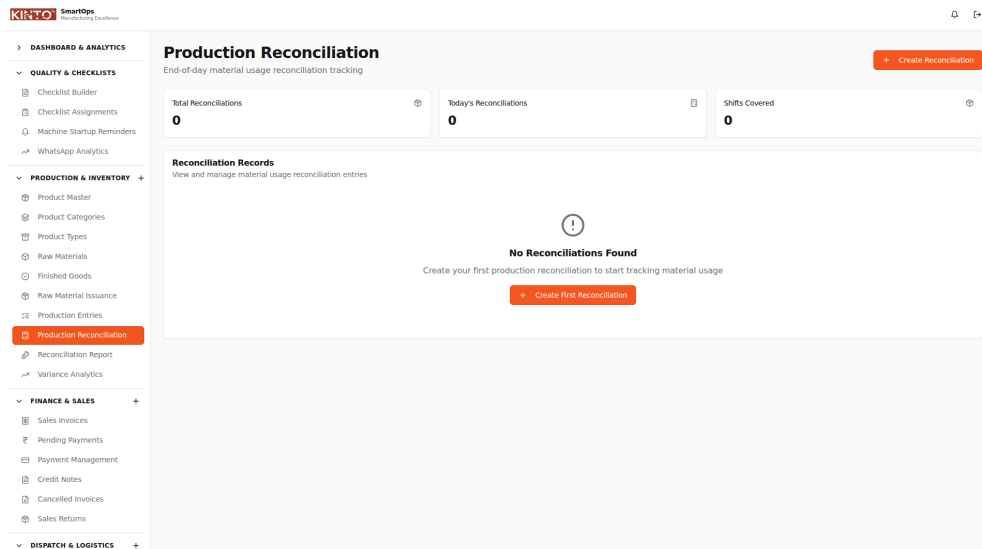

Production Entries

Data Captured: - Product produced - Quantity manufactured - Machine used - Operator name - Quality grade - Any defects or issues

Production Reconciliation

End-of-day reconciliation of production vs material usage.

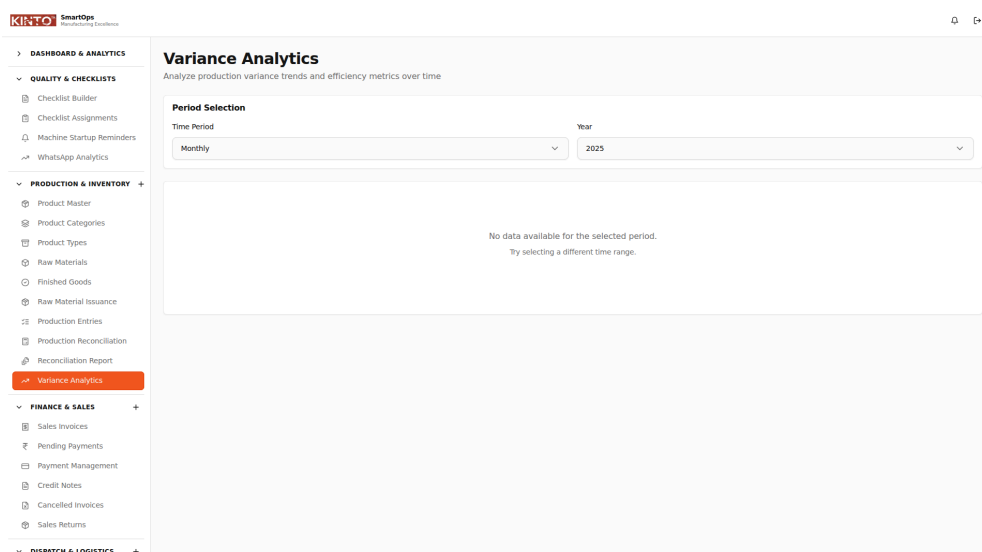

Production Reconciliation

Reconciliation Process: 1. Review daily production totals 2. Compare actual vs expected material consumption 3. Document any variances with explanations 4. Submit for approval

Variance Analytics

Analyze production variances and identify improvement opportunities.

Variance Analytics

Analytics Include: - Material usage variance trends - Machine-wise efficiency comparison - Product-wise yield analysis - Cost impact of variances

Create and manage sales invoices with GST compliance.

Sales Invoices

Pending Payments

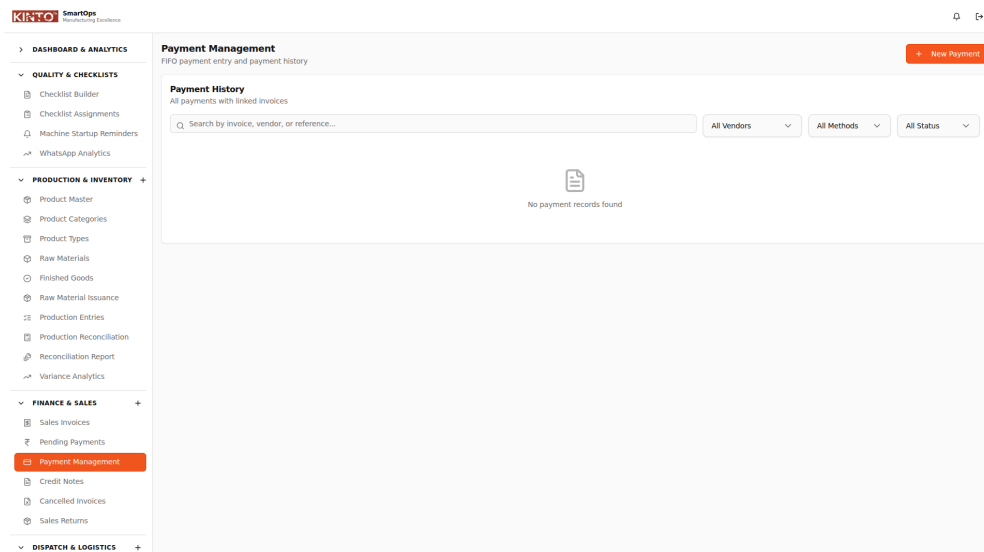

Track outstanding payments from customers.

Pending Payments

Information Displayed: - Invoice number and date - Customer name
- Total amount and pending amount - Days overdue - Payment reminder status

Payment Management

Record and allocate payments against invoices.

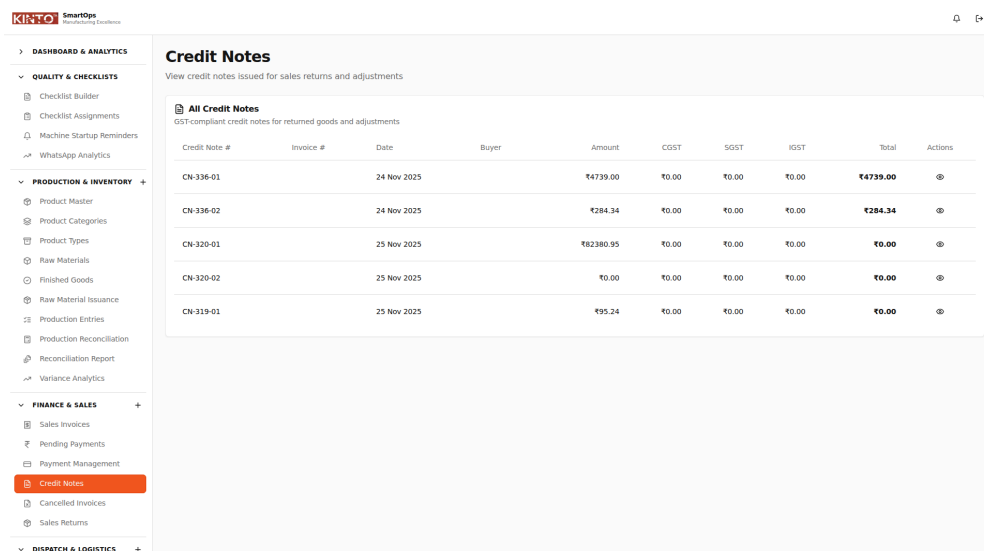

Payment Management

Payment Features: - FIFO-based payment allocation - Multiple payment modes (Cash, Bank, UPI, Cheque) - Partial payment support - Payment receipt generation - Payment write-off capability (Admin only)

Credit Notes

View and manage credit notes issued to customers.

Credit Notes

Credit Note Types: - Sales returns credit notes - Damage claims - Manual credit notes

Cancelled Invoices

Track cancelled invoices with audit trail.

Cancelled Invoices Report
View history of cancelled invoices for audit trail and GST compliance

Filters

Buyer Name: From Date: To Date:

Cancelled Invoices 9 total
Invoices that have been cancelled or reissued. Use this for audit purposes.

Invoice #	Invoice Date	Buyer	GSTIN	Amount	Cancelled On	Replacement	Actions

Cancelled Invoices

Displayed Information: - Original invoice details - Cancellation reason - Replacement invoice link (if any) - Cancelled by and date

Sales Returns

Process customer returns with quality segregation workflow.

Sales Returns & Damage Handling
Manage post-delivery returns and damaged goods

Total Returns: 0 Pending Inspection: 0 Inspected: 0

Returns List

Return Number	Invoice	Return Date	Reason	Status	Actions
No sales returns found					

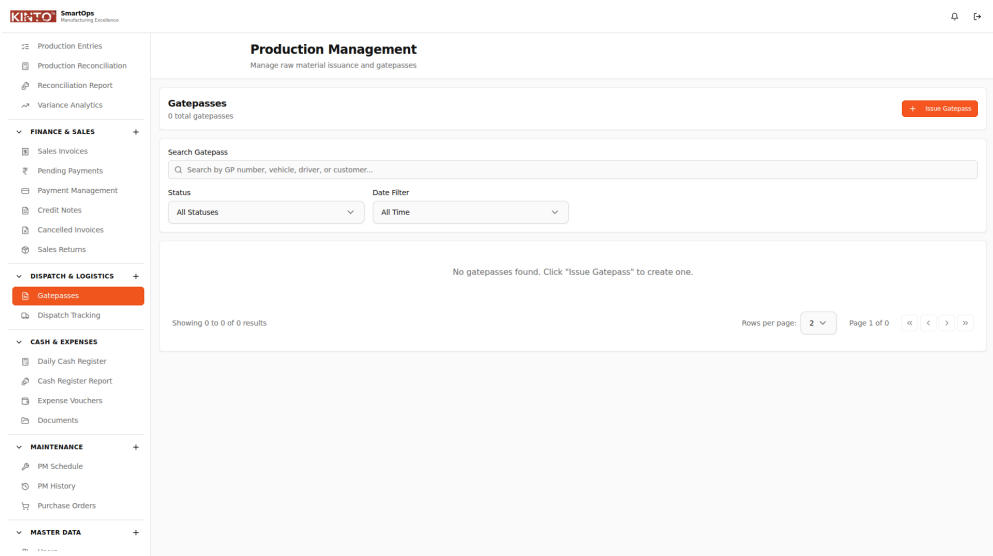

Sales Returns

Returns Process: 1. Create return request 2. Receive goods and quality check 3. Segregate: Resaleable, Repairable, or Scrap 4. Update inventory accordingly 5. Generate credit note if applicable

Dispatch & Logistics

Gatepasses

Create gatepasses for goods leaving the facility.

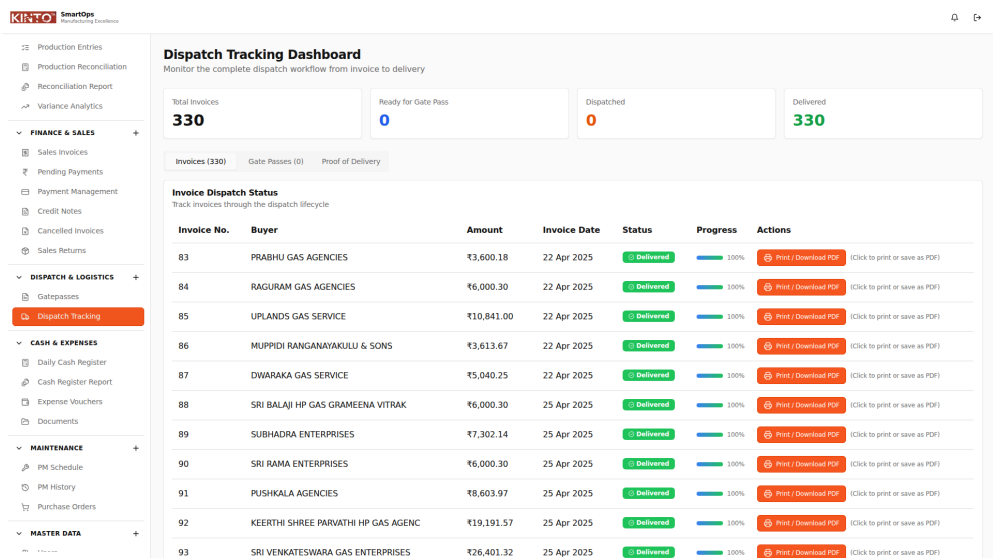

Gatepasses

Important Notes: - Invoice must be created before gatepass - Gatepass creation deducts inventory - Gatepass cancellation returns inventory

Dispatch Tracking

Track the 5-stage dispatch workflow from invoice to delivery.

Dispatch Tracking

Dispatch Stages: 1. **Invoice Created** - Initial stage 2. **Gatepass Created** - Ready for dispatch 3. **Dispatched** - Vehicle left facility 4. **In Transit** - On the way to customer 5. **Delivered** - Proof of delivery received

Cash & Expenses

Daily Cash Register

Track daily business cash flow with comprehensive ledger entries.

Date	Opening	Cash In	Expenses	Transfers	Closing	Status	Actions

Daily Cash Register

Features: - **Opening Balance:** Automatically carried forward from previous day - **Cash Received:** Record receipts by source type - Sale Cash - Secondary Sale - UPI - Bank Transfer - Other - **Expenses:** Record daily expenses with instant voucher generation - **Transfers:** Record cash transfers out of register - **Closing Balance:** Auto-calculated using formula: $\text{Closing} = \text{Opening} + \text{Cash Received} - \text{Expenses} - \text{Transfers}$

Reconciliation Workflow: 1. Enter actual cash on hand 2. System calculates variance (Expected vs Actual) 3. If variance exists, enter explanation 4. Submit reconciliation 5. Day is closed and locked

Cash Register Report

View historical cash register entries with export capability.

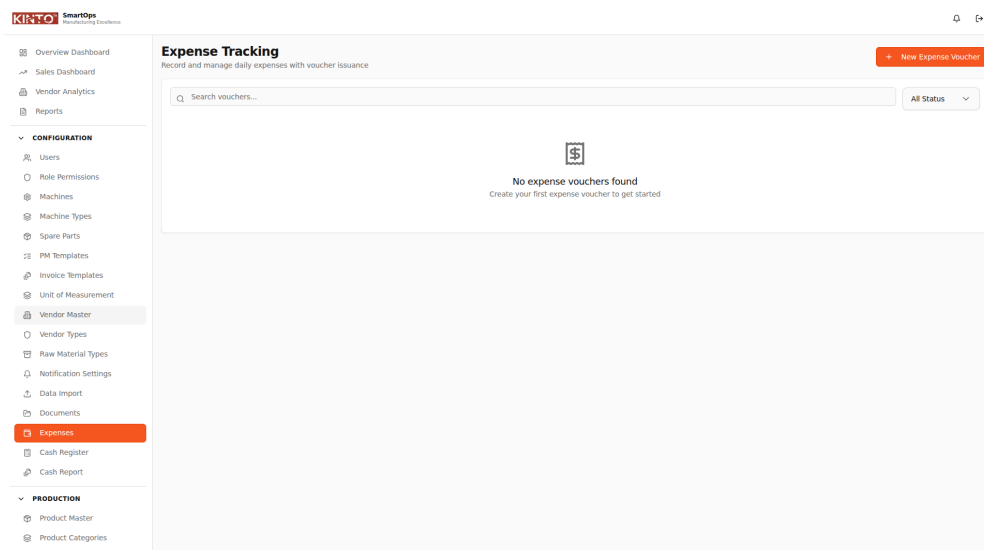

Cash Register Report

Report Features: - Date range filtering - Summary totals - Excel export - Variance highlighting - Detailed line item view

Expense Vouchers

Manage expense vouchers with approval workflow and professional printing.

Expense Vouchers

Navigation: Cash & Expenses → Expenses

How Vouchers Are Created

There are **two ways** to generate expense vouchers:

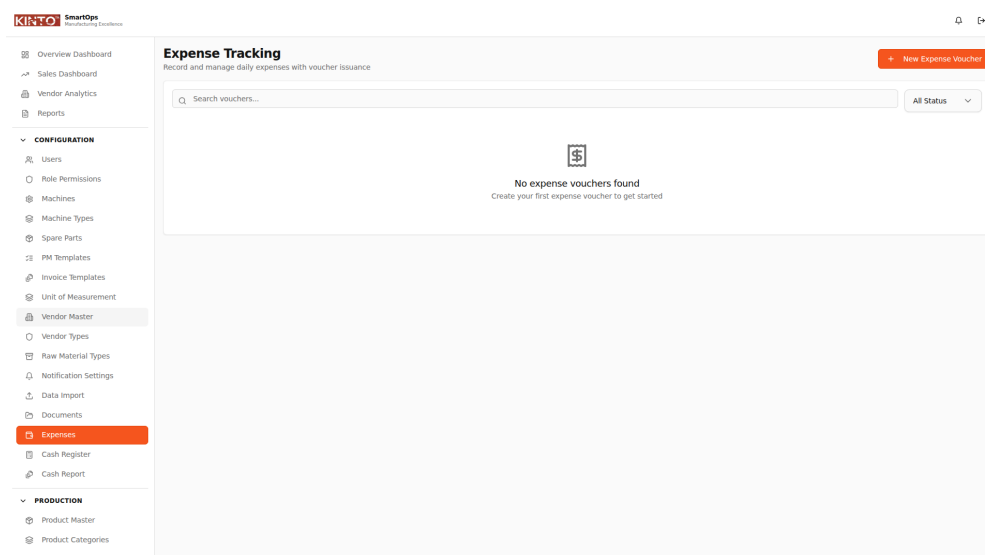

Method 1: Automatic Generation from Cash Register

1. Navigate to **Cash & Expenses → Daily Cash Register**
2. Open or create a day
3. Click **“Add”** in the Expenses section
4. Enter expense details (each line item = 1 voucher):
 - Amount
 - Item name (e.g., Diesel, Tea, Lunch)
 - Description (optional)
5. Click **“Add Another Item”** to add more expenses
6. Click **“Save X Items & Create Vouchers”**
7. Each line item automatically creates its own voucher

Method 2: Manual Creation from Expenses Page

1. Navigate to **Cash & Expenses → Expenses**
2. Click **“Create Expense”** button
3. Fill in voucher details:
 - Payee name and type
 - Payment mode (Cash/Bank/UPI/Cheque)
 - Add line items with amounts
 - Select expense categories
 - Add GST if applicable
4. Click **“Save”** to create voucher

Expense Voucher Filters

Expense Vouchers

Available Filters:

Filter	Options	Description
Search	Text box	Search by voucher number, payee name, or purpose
Status	Draft, Submitted, Approved, Rejected, Paid	Filter by voucher status
Date From	Date picker	Start date of voucher period
Date To	Date picker	End date of voucher period
Payment Mode	Cash, Bank, UPI, Cheque	Filter by payment method
Category	Dropdown	Filter by expense category

How to Filter: 1. Navigate to **Cash & Expenses → Expenses** 2. Use the search box to find specific vouchers 3. Click filter dropdowns to narrow by status, date, or payment mode 4. Results update automatically

Expense Workflow Status

Status	Description	Who Can Change
Draft	Voucher created but not submitted	Creator
Submitted	Sent for manager approval	Creator → Manager
Approved	Manager approved the expense	Manager
Rejected	Manager rejected the expense	Manager
Paid	Payment has been made	Admin/Manager

Printing Expense Vouchers

Print Format: A5-sized vouchers (2 per A4 page)

Print Expense Vouchers

50 vouchers ready to print

Voucher Print Layout: - Company name: **Inmoisture Private Limited** - Voucher number and date - Payee details - Line items with amounts - GST breakdown (if applicable) - Total amount in words and figures - **Signature boxes:** - Received By (with amount) - Cashier - Approved By

How to Print Single Voucher: 1. Navigate to **Cash & Expenses → Expenses** 2. Find the voucher you want to print 3. Click the **Print** icon (🖨️) on the voucher row 4. Voucher opens in print preview 5. Click **Print** or press Ctrl+P

How to Print Multiple Vouchers (from Cash Register Report): 1. Navigate to **Cash & Expenses → Cash Register Report** 2. Set the date range 3. Click **“Print Vouchers”** button 4. All expense vouchers for that period open in print view 5. Vouchers are arranged 2 per A4 page (A5 size each) 6. Click **Print** or press Ctrl+P

How to Print from Daily Cash Register: 1. Navigate to **Cash & Expenses → Daily Cash Register** 2. Select a day to view details 3. In the Expenses section, click the **Print** icon next to any expense 4. Single voucher opens in print preview

Voucher Number Format

Vouchers created from Cash Register follow this format:

EXP-CR-YYYYMMDD-XXX-NN

- **EXP-CR** - Expense from Cash Register
- **YYYYMMDD** - Date (e.g., 20251126)
- **XXX** - Sequence number for the day
- **NN** - Line item number (for multiple items)

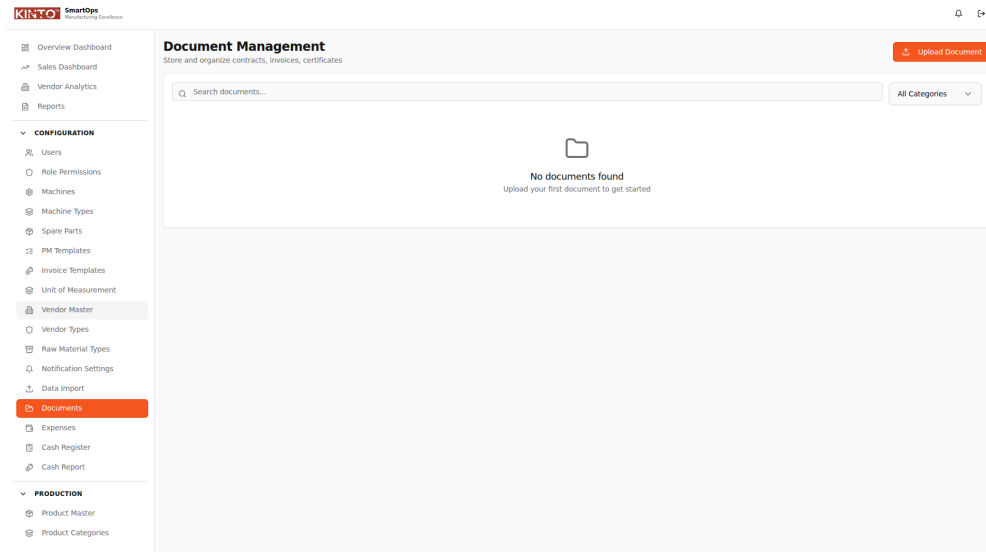

Example: EXP-CR-20251126-001-01 (First voucher, first item on Nov 26, 2025)

Quick Actions on Expenses Page

Action	Icon	Description
View	👁️	View voucher details
Print	🖨️	Print single voucher (A5 format)
Edit	✎️	Edit draft voucher
Submit	➡️	Submit for approval
Approve	✓	Approve expense (Manager only)
Reject	✗	Reject expense (Manager only)
Mark Paid	💰	Mark as paid (Admin only)

Documents

Store and manage business documents with expiry tracking.

Documents

Document Management Features: - Category-based organization - Expiry date tracking with color-coded alerts - Link to vendors or invoices - Bulk download (ZIP) - Sharing capabilities - Automated expiry notifications via WhatsApp and Email

Maintenance

PM Schedule

View preventive maintenance schedule for all machines.

Note: This screen may require specific navigation access based on your role.

PM History

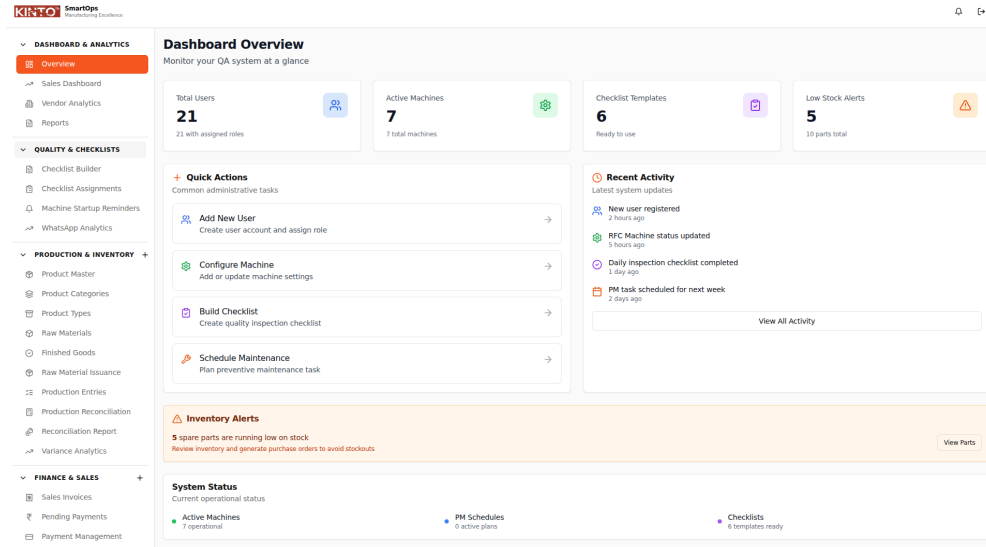

Track completed preventive maintenance activities.

Tracked Information: - Maintenance date and type - Machine details - Tasks completed - Parts replaced - Next due date

Master Data

Users

Manage system users and their credentials.

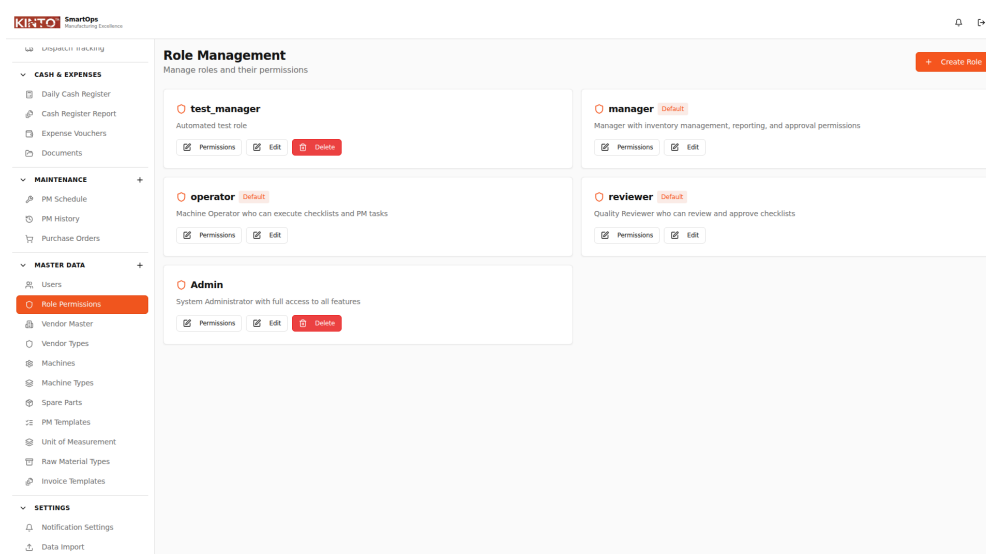

Users

User Management: - Create new users - Set roles and permissions - Enable/disable accounts - Reset passwords

Role Permissions

Configure access permissions for each role across all 50 system screens.

Role Permissions

Permission Levels: - **None** - No access to the screen - **View** - Can view but not modify - **Edit** - Can view and modify data

Vendor Master

Manage vendor information and classification.

Code	Name	Mobile	GST/Aadhaar	City	Type	Classifications	Cluster	Status	Actions

Configurable Notifications: - Machine startup reminders - Checklist assignment alerts - Payment reminders - Document expiry alerts - Order confirmations

Data Import

Import data from external systems like Vyapaar.

KINTO SmartOps
Powering Excellence

Vyapaar Data Import
Upload Excel files from Vyapaar to migrate your data

Important Information
This will clear existing data and import fresh data from Vyapaar Excel files. You can either upload 3 separate files (Party Report, Sale Report, Item Details) OR 2 files if your Sale Report contains an "Item Details" sheet.

Upload Excel Files
Select the Excel exports from Vyapaar (Item Details is optional if included in Sale Report)

Party Report (Vendors/Customers)
Choose File No file chosen

Sale Report (Invoices)
Choose File No file chosen

Item Details Report (Products) - Optional
Only needed if not included as a sheet in Sale Report
Choose File No file chosen

Start Import

How to Export from Vyapaar

- Party Report**
Go to Reports → Party Report → Export to Excel
- Sale Report**
Go to Reports → Sale Report → Export to Excel
- Item Details Report**
Go to Reports → Item Details → Export to Excel

Data Import

Import Features: - Excel-based data import - Fuzzy matching for vendors - Intelligent date conversion - Automatic vendor type classification - Comprehensive error handling
