KINTO Smart Ops - Complete Feature Documentation

Version: 1.0
Last Updated: November 2024
Company: Inmoisure Private Limited
GSTIN: 37AAHCI5047B1ZR

How to Use This Documentation

This guide explains every feature of KINTO Smart Ops in simple language. Each feature includes:

Section

- **What is this?**
- **Why do you need it?**
- **Where to find it?**
- **Screenshot**
- **Step-by-Step**
- **Common Mistakes**
- **FAQ**

What You'll Find

- Simple explanation of the feature
- Real business reasons to use this
- Exact navigation path and URL
- Visual reference from the actual system
- Detailed instructions with examples
- What to avoid
- Answers to common questions

Table of Contents

- 1. [Getting Started - Dashboard](#1-getting-started---dashboard)
- 2. [Master Data - Setting Up Your Business](#2-master-data---setting-up-your-business)
- 3. [Production & Inventory](#3-production--inventory)
- 4. [Sales & Invoicing](#4-sales--invoicing)
- 5. [Dispatch & Delivery](#5-dispatch--delivery)
- 6. [Money & Payments](#6-money--payments)
- 7. [Returns & Corrections](#7-returns--corrections)
- 8. [Daily Cash Management](#8-daily-cash-management)
- 9. [Quality Checklists](#9-quality-checklists)
- 10. [Document Storage](#10-document-storage)
- 11. [Reports](#11-reports)

1. Getting Started - Dashboard

1.1 Login Page

What is this?

The login page is where you enter your username and password to access the system.

Screenshot

[Screenshot: See attached file]

How to Login

- 1. Enter your **Username** (provided by administrator)
- 2. Enter your **Password**
- 3. Click **"Sign In"** button
- 4. You'll be redirected to your dashboard based on your role

1.2 Main Dashboard (Overview)

What is this?

The Dashboard is your home page - the first screen you see after logging in. It shows a quick summary of everything happening in your business today.

Why do you need it?

Imagine walking into your office and instantly knowing:

- How much you sold today
- How much money customers owe you
- What needs your attention right now
- Any pending tasks

That's what the Dashboard gives you - a bird's eye view of your entire business in one screen.

Where to find it?

How to Navigate

Sidebar !' Dashboard & Analytics !' **Overview**

Or simply click the **KINTO logo** at the top

URL

/

Screenshot

[Screenshot: See attached file]

What Each Card Shows

Card

Today's Sale

Pending Payments

Today's Production

This Month Sale

What It Means

Total invoices created today

Money customers still owe you

Units manufactured today

Total sales this month

Example

145,000 means you billed 145,000 today

13,25,000 is outstanding from all customers

150 units produced in factory

Running total since 1st of month

Quick Actions Explained

Button

- **+ New Invoice**
- **+ New Vendor**
- **Record Payment**
- **View All**

What Happens When You Click

- Opens form to create a new sales bill
- Opens form to add a new customer
- Opens form to record money received
- Shows complete list with all entries

FAQ

- Q: Why doesn't the dashboard show yesterday's data?
A: Dashboard shows TODAY's summary by default. Use the date filter (top right) to see other dates.
- Q: The numbers look wrong. What should I do?
A: Dashboard updates in real-time. If numbers seem off:
1. Refresh the page (press F5)
 2. Check if recent invoices were saved properly
 3. Verify payment entries are complete

Section

- **Dashboard & Analytics**
- **Quality & Checklists**
- **Production & Inventory**
- **Finance & Sales**
- **Dispatch & Logistics**
- **Cash & Expenses**
- **Master Data**
- **Settings**

1.3 Sidebar Navigation

What is this?

The sidebar on the left side of the screen contains all the navigation links to different features of the system.

Screenshot

[Screenshot: See attached file]

Navigation Sections

Features Inside

- Overview, Sales Dashboard, Vendor Analytics, Reports
- Checklist Builder, Assignments, Machine Startup
- Products, Raw Materials, Issuance, Production
- Invoices, Vendor History, Payments, Credit Notes
- Gatepasses, Dispatch Tracking
- Cash Register, Expenses, Documents
- Users, Vendors, Machines, Templates
- Notifications, Data Import

2. Master Data - Setting Up Your Business

Think of Master Data as the foundation of your system. Before you can create invoices or track production, you need to set up:

- What products you sell
- Who your customers are
- What raw materials you use
- How you measure things (kg, liters, pieces)

2.1 Product Master

What is this?

A complete list of all products your company makes or sells. Like a catalog of everything you offer to customers.

Why do you need it?

When you create an invoice, you select products from this list. Each product has:

- A code (for quick identification)
- A name (what customers see)
- A price (default selling rate)
- Tax information (HSN code, GST rate)

Without this setup, you cannot create invoices.

Where to find it?

How to Navigate

****Sidebar** !' Production & Inventory !' **Product Master****

URL

`/` (Products tab)

Screenshot

[Screenshot: See attached file]

Step-by-Step: Add New Product

1. ****Navigate:**** Sidebar !' Production & Inventory !'
Product Master
2. ****Click:**** "Add Product" button (top right)
3. ****Fill Form:****

Field	Required	Description
Product Code	Yes	Unique identifier (e.g., PROD-001)
Product Name	Yes	Display name
Category	Yes	Select from dropdown
Type	Yes	Select product type
Unit of Measurement	Yes	Select UOM
HSN Code	Yes	GST HSN code
GST Rate	Yes	Tax percentage
Selling Price	Yes	Default selling price

4. **Click:** "Save" button

5. **Result:** Product appears in the list

Tips

****Tip:**** Set up Categories and Types before adding products for better organization.

****Warning:**** HSN Code and GST Rate are required for invoice generation.

2.2 Product Categories

What is this?

Organize products into logical groups (e.g., Electronics, Chemicals, Packaging).

How to access?

How to Navigate

URL

****Sidebar**** !' Production & Inventory !' ****Product Categories**** ` (Categories tab)

Screenshot

[Screenshot: See attached file]

Step-by-Step: Add Category

1. Click "Add Category" button
2. Enter Category Name and Code
3. Optionally add description
4. Click "Save"

2.3 Product Types

What is this?

Sub-classification within categories. More specific grouping.

Real-World Example

Category: Films
% % % Type: VCI Films (for corrosion protection)
% % % Type: Barrier Films (for moisture protection)
% % % Type: Stretch Films (for wrapping)
% % % Type: Shrink Films (for heat shrinking)

Screenshot

[Screenshot: See attached file]

2.4 Raw Materials

What is this?

Materials used in production. Tracks inventory, conversion methods, and loss percentages.

Why do you need it?

- Track what raw materials you have in stock
- Know when to reorder
- Calculate production costs
- Manage Bill of Materials (BOM)

Screenshot

[Screenshot: See attached file]

Key Fields Explained

Field	What It Means	Example
Material Code	Unique identifier	RM001
Material Name	What you call it	LDPE Granules
UOM	How you measure it	Kilogram
Current Stock	How much you have now	5,000 kg
Reorder Level	When to order more	1,000 kg (alert when stock falls below)
Loss Percentage	Expected wastage	2% (some material wasted in production)

2.5 Vendor Master (Customer Database)

What is this?

Your complete customer database. Everyone you sell to is called a "Vendor" in this system.

Why do you need it?

- Store customer contact details
- Track their purchase history
- See how much they owe you
- Auto-fill their details in invoices
- Classify customers for better management

Where to find it?

How to Navigate

Sidebar !' Master Data !' **Vendor Master**

URL

`/vendor-management`

Screenshot

[Screenshot: See attached file]

Step-by-Step: Add a New Customer

- 1. **Navigate:** Sidebar !' Master Data !' Vendor Master
- 2. **Click:** "+ Add Vendor" button
- 3. **Fill Required Fields:**

Field	Required	Description
Vendor Code	Yes	Auto-generated or manual
Vendor Name	Yes	Business name
Mobile Number	Yes	Primary contact
GSTIN	No	GST Number (15 digits)
Address	Yes	Full address
City, State	Yes	Location

- 4. **Assign Vendor Types:** Select applicable types (Retailer, Distributor, etc.)
- 5. **Click:** "Save"

Vendor Classification (3-Tier)

Tier	Description	Example
Primary	Direct large buyers	Distributors
Secondary	Medium-sized buyers	Retailers
Tertiary	Small/occasional buyers	Walk-in customers

FAQ

Q: Customer doesn't have GST number. Can I still add them?
A: Yes! GSTIN is optional. Leave it blank for unregistered customers.

Q: Can I have multiple contacts for one vendor?
A: Currently, store primary contact in the vendor record. Add secondary contacts in the Notes field.

3. Production & Inventory

3.1 Raw Material Issuance

What is this?

When you take materials from store and give them to the production floor, you "issue" them. This feature tracks every material taken for production.

Why do you need it?

Imagine your storeroom has 5,000 kg of LDPE granules. Production needs 500 kg today. After issuing:

- Store shows: 4,500 kg remaining
- Production floor has: 500 kg to use
- You have a record of who took what and when

Screenshot

[Screenshot: See attached file]

Step-by-Step: Issue Materials to Production

1. **Click:** "+ New Issuance" button
2. **Fill Header:**

Field	Description
Issue Date	Date of issuance
Issued To	Production line/person
Remarks	Any notes

3. **Add Items:**

- Click "Add Item"
- Select Raw Material
- Enter Quantity
- System shows available stock

4. **Click:** "Save & Issue"

5. **Result:** Inventory reduced, issuance record created

Important: System prevents issuing more than available stock.

3.2 Production Entries

What is this?

Recording what was produced today. Tracks finished goods output and compares with expected production based on Bill of Materials (BOM).

Screenshot

[Screenshot: See attached file]

Understanding Variance

Variance Range	Status	What It Means
0-5%	Normal	Expected variation, no concern
5-10%	Warning	Review process, might be issue
>10%	Alert	Investigate immediately

3.3 Production Reconciliation

What is this?

End-of-day check that compares:

- Materials issued to production
- Materials actually used
- Finished goods produced
- Any leftover materials

Screenshot

[Screenshot: See attached file]

The Formula

$$\text{Issued Materials} = \text{Used Materials} + \text{Returned Materials} + \text{Loss}$$

If this doesn't balance, there's a problem that needs investigation.

3.4 Variance Analytics

What is this?

Visual analysis of production variance trends over time to identify patterns and issues.

Screenshot

[Screenshot: See attached file]

3.5 Finished Goods

What is this?

Finished Goods is where you track all your completed products that are ready for sale. These are products that have passed quality checks and are available for customers.

Why do you need it?

- **Know what's ready to sell:** See exactly how much finished stock you have
- **Quality tracking:** Only quality-approved products appear here
- **Batch management:** Track products by batch number for traceability
- **Stock planning:** Know when you need to produce more

Where to find it?

How to Navigate

Side navigation: Production & Inventory > Finished Goods

Or from Dashboard > Click "Finished Goods" tab

URL

/inventory/finished-goods (Finished Goods tab)

/inventory-management Inventory Management page

Screenshot

[Screenshot: See attached file]

Screen Elements

Element	Type	Description
+ Add Finished Good	Button	Record new finished goods from production
Search	Input	Find by product name or batch number
Quality Status Filter	Dropdown	Filter by Approved/Pending/Rejected
Date Filter	Dropdown	Filter by production date range
Finished Goods Table	Table	List of all finished goods with details

Key Fields Explained

Field	What It Means	Example
Product	Which product was made	VCI Film 100 micron
Batch Number	Unique production batch ID	BATCH-2024-1130-001
Quantity	How much was produced	500 kg
Production Date	When it was made	30-Nov-2024
Quality Status	Has it passed QC?	Approved ' / Pending #ó / Rejected 'L
Machine	Which machine made it	Extruder Line 1
Operator	Who made it	Ramesh Kumar

Quality Status Flow

Production Complete !' Pending QC !' Quality Check !' Approved/ Rejected

! "

If Approved:

Available for Sale '

! "

If Rejected:

Sent for Rework or Scrap 'L

Step-by-Step: Add Finished Goods Entry

1. **Navigate:** Sidebar !' Production & Inventory !' Finished Goods
2. **Click:** "+ Add Finished Good" button
3. **Fill Details:**

Field	What to Enter
Product	Select from product list
Quantity	How much was produced

Batch Number
Production Date
Machine
Operator
Quality Status

Unique batch ID (can be auto-generated)
When produced
Which machine was used
Who operated the machine
Set to "Pending" initially

4. **Click:** "Save"
5. **Result:** Entry appears in the list with "Pending" status

When Does Finished Goods Inventory Reduce?

Action

Invoice Created
Gatepass Created
Invoice Cancelled
Gatepass Cancelled

Effect on Finished Goods

'L No change
' Stock reduces
'L No automatic return
' Stock returns

***Important:** Finished goods stock is only deducted when a Gatepass is created, not when an Invoice is created.*

FAQ

Q: Why can't I see some products in Finished Goods?
A: Only products with Quality Status "Approved" can be used in invoices. Check if the item is still "Pending" quality check.

Q: How do I update quality status?
A: Find the entry, click Edit (' p), and change the Quality Status dropdown.

Q: What happens to rejected items?
A: Rejected items don't appear as available stock. They need to be either reworked (create new batch) or scrapped.

Q: Can I edit quantity after saving?
A: Yes, but only if the goods haven't been dispatched (no gatepass created for those items).

4. Sales & Invoicing

4.1 Sales Dashboard

What is this?

Overview of your sales performance with charts and key metrics.

Screenshot

[Screenshot: See attached file]

4.2 Sales Invoices

What is this?

Create GST-compliant invoices for customers. Includes company details, buyer information, item details, taxes, and payment terms.

Why do you need it?

- Get paid by customers
- Legal requirement for GST
- Track what was sold to whom
- Proof of sale for accounting

Screenshot

[Screenshot: See attached file]

Invoice Status Explained

Status	Color	Meaning
Draft	&a Gray	Not finalized yet
Pending	Ø=Ý4 Red	No payment received
Partial	Ø=ßá Yellow	Some payment received
Paid	Ø=ßâ Green	Fully paid
Cancelled	&« Black	Cancelled invoice

4.3 Invoice Detail Page

What is this?

When you click on any invoice, you see its complete details plus available actions.

Screenshot

[Screenshot: See attached file]

Available Actions Explained

Button	When Available	What Happens
--------	----------------	--------------

Print	Always	Opens PDF for printing
Create Gatepass	No gatepass exists	Creates dispatch document
Record Payment	Invoice not fully paid	Opens payment form
Cancel & Reissue	Same month, no gatepass	Cancels this, creates new
Create Credit Note	After gatepass created	For adjustments

4.4 Cancel & Reissue Invoice

What is this?

If you made a mistake in an invoice, you can cancel it and create a new one.

When to use?

- ****Current month invoice**** only
- ****Before gatepass**** is created
- Wrong price entered
- Wrong quantity
- Wrong customer

GST Rule (Very Important!)

Why

GST return not yet filed
 GST return already filed
 GST return already filed

Invoice Month	Correction Method
Current Month	Cancel & Reissue
Previous Month	Credit Note (for reduction)
Previous Month	Debit Note (for increase)

5. Dispatch & Delivery

5.1 Gatepasses

What is this?

A gatepass is official permission for goods to leave your premises. The security guard needs this document to let the vehicle out.

Why do you need it?

- Proof that goods were sent
- Security control at exit gate
- Triggers inventory reduction
- Part of dispatch workflow

Screenshot

[Screenshot: See attached file]

Important: When does inventory reduce?

Invoice Created !' Inventory: NO change
!"

Gatepass Created !' Inventory: REDUCED '
!"

Dispatched !' Already reduced

****Key Point:**** Stock is deducted when Gatepass is created, NOT when Invoice is created.

5.2 Dispatch Tracking

What is this?

Track where your goods are - from warehouse to customer's door. A 5-stage journey.

Screenshot

[Screenshot: See attached file]

The 5-Stage Journey

Stage 1	!	Stage 2	!	Stage 3	!	Stage 4	!	Stage 5
INVOICE		GATEPASS		DISPATCHED		IN TRANSIT		DELIVERED
CREATED		CREATED		(Left Gate)		(On the way)		(POD Done)
Ø=ÜÄ		Ø=Üæ		Ø=þš		Ø=þăþ		

Stage Details

Stage	Status	Who Updates	Description
1	Invoice Created	Auto	Invoice saved
2	Gatepass Created	Warehouse	Goods packed, gatepass issued
3	Dispatched	Logistics	Vehicle left premises
4	In Transit	System	Goods in transport
5	Delivered (POD)	Driver/Customer	Proof of delivery captured

6. Money & Payments

6.1 Pending Payments

What is this?

Dashboard showing all outstanding amounts from customers, organized by age.

Why do you need it?

- Know exactly how much is pending collection
- Identify old unpaid invoices
- Prioritize follow-ups
- Cash flow planning

Screenshot

[Screenshot: See attached file]

Aging Buckets Explained

Age Bucket	Meaning	Action Needed
0-30 Days	Recent invoices	Normal - within credit period
31-60 Days	Slightly overdue	Gentle reminder
61-90 Days	Significantly overdue	Strong follow-up
Over 90 Days	Seriously overdue	Escalate, consider legal action

6.2 Credit Notes

What is this?

A document to reduce an invoice amount after it was issued. Think of it as a "negative invoice".

When to use?

- Customer returned goods (via Sales Return)
- Price reduction given after invoice
- Discount agreed later
- Damaged goods compensation

Screenshot

[Screenshot: See attached file]

Credit Note vs Cancel & Reissue

Situation	Use Credit Note	Use Cancel & Reissue
Current month, no gatepass	'L	' Better option

Current month, with gatepass
Previous month invoice

' Only option
' Only option

'L Not possible
'L Not possible

7. Returns & Corrections

7.1 Sales Returns (Physical Goods Return)

What is this?

When a customer physically returns goods to you (damaged, wrong product, quality issue), you process it through Sales Returns.

Screenshot

[Screenshot: See attached file]

Sales Returns vs Credit Notes - What's the Difference?

Sales Return

Physical goods come back
3-stage workflow (receive, inspect)
May result in restocking
Takes time (inspection needed)

Credit Note

No goods movement
Direct financial adjustment
Just reduces invoice amount
Immediate effect

The 3-Stage Process

Stage 1: CREATE RETURN
Customer reports issue !' You create return request in system
Stage 2: RECEIVE GOODS
Goods physically arrive !' Warehouse marks as received
Stage 3: INSPECT & DECIDE
Quality team checks !' Decide: Restock or Scrap !' Credit Note auto-generated

8. Daily Cash Management

8.1 Quality & Checklists

What is this?

Create custom checklists for regular quality checks, machine startup procedures, or safety inspections.

Screenshot

[Screenshot: See attached file]

Types of Questions You Can Add

Question Type	Example	Answer Format
Yes/No	Is machine cleaned?	Yes or No
Number	What is temperature?	25.5
Text	Describe any issues	Free text
Photo	Upload machine photo	Image

8.2 Machine Startup Reminders

What is this?

Automated reminders for daily machine startup checklists.

Screenshot

[Screenshot: See attached file]

8.3 Reports Hub

What is this?

Central location for all system reports - sales, production, inventory, and compliance.

Screenshot

[Screenshot: See attached file]

8.4 User Management

What is this?

Manage who can access the system and what they can do.

Screenshot

[Screenshot: See attached file]

8.5 Role Permissions

What is this?

Control which features each user role can access.

Screenshot

[Screenshot: See attached file]

9. Quality Checklists

9.1 Preventive Maintenance

What is this?

Schedule and track maintenance activities for machines and equipment.

Screenshot

[Screenshot: See attached file]

9.2 Reviewer Dashboard

What is this?

Dashboard for reviewers to see pending approvals and completed checklists.

Screenshot

[Screenshot: See attached file]

10. Document Storage

10.1 Notification Settings

What is this?

Configure how and when the system sends notifications.

Screenshot

[Screenshot: See attached file]

11. Reports

11.1 Available Reports

Report	Purpose	Location
Sales Summary	Daily/Monthly sales totals	Reports Hub
GST Report (GSTR-1)	Data for GST filing	Reports Hub
Outstanding Report	All pending payments	Pending Payments
Cancelled Invoices	Audit trail of cancellations	Cancelled Invoices
Write-Off Report	Written off amounts	Write-Off Report
Production Variance	Material usage analysis	Production Reports
Cash Register Report	Daily cash flow history	Cash Register Report
Vendor History	Individual customer ledgers	Vendor History

Quick Reference Cards

Daily Operations Checklist

Morning (Start of Day)

- [] Open Cash Register (enter opening balance)

- ☐ Check Machine Startup Checklists completed
- ☐ Review pending dispatches for today
- ☐ Check any overdue payments

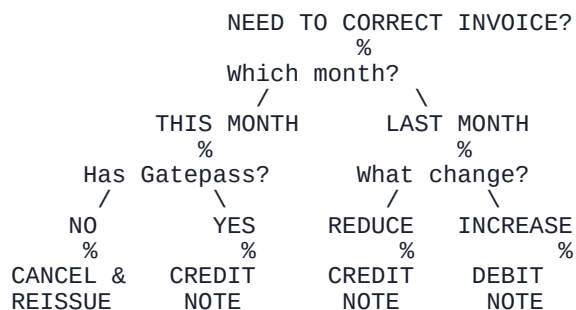

During Day

- ☐ Create invoices for orders
- ☐ Create gatepasses for dispatches
- ☐ Record payments received
- ☐ Process any returns

Evening (End of Day)

- ☐ Complete production reconciliation
- ☐ Reconcile cash register
- ☐ Review next day's pending items
- ☐ Close cash register
